Alfa Laval is the market leading marine service organization. In order to secure proximity to our customers where they do business, we established our first companies dedicated solely to after sales services already three decades ago and have since steadily expanded our service network.

Alfa Laval offers spare parts for a wide range of Alfa Laval Aalborg marine and floating production systems:
- Boiler systems (steam and hot-water)
- Inert gas systems (IGS/IGG)
- Thermal fluid systems
- Exhaust gas economizers and waste heat recovery units after gas turbines
- Burners (oil/gas-fired)
- Control/safety/burner management systems

We also possess OEM knowledge, operating/service experience and full documentation for all products and systems delivered by Alfa Laval.

We build them, we service them - and we supply the spare parts.

We keep a full stock of the most common consumables and OEM spare parts for shipment from strategically placed stocks around the world. Genuine, original spare parts can be shipped within 24 hours to any corner of the world.

From our local service stations we give fast response and correct identification of the necessary Parts & Service followed by fast and precise delivery are factors that make Alfa Laval’s spare parts organization the superior choice in OEM spare parts. For Aalborg products, we also refer to our catalogue management system. Here we provide an overview of the product brands we supply spare parts for.
### How to contact Alfa Laval

Contact details for all countries are continually updated on our web site. Please visit [www.alfalaval.com](http://www.alfalaval.com) or [www.aalborg-industries.com](http://www.aalborg-industries.com) to access the information.
