

Invitation

2004 TradeNet Conference

Following the last successful TradeNet Conference, ShipServ is pleased to invite you and your colleagues to the 2004 TradeNet Conference, which will take place on 18 June at the Langelinie Pavillon in Copenhagen, Denmark.

A lot of exciting things have happened since the last TradeNet Conference and this event is a great opportunity to hear about the latest developments in e-commerce in shipping in general and in electronic Ship Supply Management in particular.

At this Conference you can:

- Hear a shipping company speak about its e-commerce experiences
- Learn about ShipServ's new electronic ship supply management solution
- Put questions to a panel of our alliance partners - ship management software vendors
- Tailor your day by choosing between a number of break-out sessions - including:
 - Key Performance Indicators - optimising shipping companies' ship supply management resources
 - Data Management - a joint opportunity for shipowners/managers and suppliers in improving supply chain performance
 - Web Services Technology - simplifying and extending integration opportunities between trading partners
 - Visibility in the ship supply delivery process - how electronic ship supply management makes it possible
- See new ship supplier solutions from ShipServ and an alliance partner

Furthermore, there will be plenty of time to meet your trading partners and swap experiences with other users.

Conference Dinner

A dinner will take place the night before (Thursday, 17 June) at 8.00 pm also in the Langelinie Pavillon. This will allow you the opportunity to meet ShipServ staff and fellow TradeNet members while enjoying dinner and the surprise entertainment.

Hotels

ShipServ has negotiated special rates at two hotels in Copenhagen for those who need accommodation for the conference, or those who want to stay for the weekend. For both hotels you are required to make your own reservation using the ShipServ reference to qualify for the special rate.
