Dear Business Partner, dear Customer,

The family owned company Horst Kürvers GmbH was founded in 1966 and throughout its long history has become a major player in the market. Expertise, dependability and the focus on quality have since been the company’s mark of success.

I am very pleased to report that our newly established subsidiary Kürvers Valves GmbH will join in this tradition by providing a full range of services to customers includes engineering and logistics throughout the world. Our range of services encompasses the planning, optimisation and technical support of national and international projects. As a full service company specialising in industrial valves our focus is on the development of solutions that are exactly tailored to the requirements of our customers.

With a strong network of partners we are able to process even urgent orders to your utmost satisfaction.

I look forward to a successful business relationship!

Boris Vincelj
Managing Director
KÜRVERS VALVES GMBH
A COMPANY OF THE KÜRVERS GROUP

Since it was founded in 1966, the family owned company Horst Kürvers GmbH has established a strong presence in the market. Today the name Horst Kürvers stands for know-how, dependability and quality, which also reflect the traditional values of the enterprise.

KÜRVERS VALVES - A STRONG PARTNER
The expertise of the independent subsidiary Kürvers Valves GmbH in cooperation with DHV Industries contains the planning, optimisation and technical support of national and international projects. Kürvers Valves is a dynamic trade and service enterprise specialising in industrial valves for refineries, power plants, chemical and transport systems.

We develop solutions that are exactly tailored to the requirements of the customer. This has been achieved by an established partnership, which ensures a worldwide network with access to the required product. Experts in each field guarantee that all aspects of our planning and implementation contribute to the success of a project. Our strengths are highly competent employees, dependability and transparency. In short: Our customers can rely on a full-service solution from a strong partner.

KÜRVERS GROUP:

We know what you are talking about – and we know what we are doing.

OUR EXPERIENCE – YOUR ADDED VALUE IN PERFORMANCE

Kürvers Valves has the ability to plan and implement projects with a high level of dynamism and versatility. In addition to valves, we are also capable of procuring all fittings and accessories, from fastening devices to controllers and pipelines.
PLANNING AND IMPLEMENTATION
FROM A TO Z

Our affiliation with the parent company gives us the necessary resources to carry out extensive projects with superior ease. Our goal, in close cooperation with the customer, is to achieve a substantial increase in cost effectiveness, safety and quality – while relieving the burden on the plant operator. Optimally trained employees with the core competences of development, production, delivery and project management are the basis of all services. Each project is processed with maximum flexibility.

CONSULTING
We devote our entire attention to the task at hand, and our experience often enables us to apply new and more effective methods and possibilities. Close cooperation with the customer consists especially of detailed examination of their structure in order to minimise interruptions in the processes. This allows us to carry out projects to the customer’s utmost satisfaction and in accordance with objectives.

PROJECT MANAGEMENT
The project management team continuously monitors the progress of the project to assure compliance with deadlines and achievement of the customer’s requirements. This guarantees that each task is completed to schedule and that the customer is informed of the current project status at all times. It also ensures the timely response and adaptation to any changes or deviations during the process. Our established structure, consisting of a project manager and assigned experts, allows us to respond with maximum flexibility and dynamism – also in the case of urgent orders. In addition to standard products such as valves of diverse designs and sizes, pipes, fittings and mounting accessories, seals and other components, we also offer complete packages consisting of special solutions. Due to efficient warehousing in our supplier network and state-of-the-art logistics systems we can offer not only standard, but also special coatings and sizes, as well as specific packaging and mounting materials.

DOCUMENTATION
Comprehensive documentation allows us to ensure the availability of all valves and components at all times. Custom-tailored document management systems guarantee compliance with the customer’s requirements and on-schedule creation of documentation, as well as testing, approval, delivery and electronic archiving.
KÜRVERS VALVES GMBH  
PRODUCT PORTFOLIO

We deliver high-quality valves produced by internationally recognised manufacturers located around the world.  
To meet your every day requirement.

WE DELIVER …
… products that conform to customer specifications and are suitable for the application. The portfolio of Kürvers Valves includes not only diverse designs, materials and sizes, compatible accessories and special solutions, but also fastening materials, pipe sections and seals.
This large spectrum and high availability of our products ensure we are the ideal partner, whether the requirement is for a single valve or a large-scale project. We offer the best possible quality at an outstanding price-performance ratio and coordinate the interplay of all products of our manufacturers. The quality management team for the project ensures that all work is carried out in accordance with the highest standards, also with respect to safety. The customer benefits from competitively priced solutions that are optimised for reliable long-term operation, reduced maintenance intervals, and high profitability.

VALVES

GATE VALVES

Versions:
→ Cast gate valves
→ Forged gate valves
→ Pipeline gate valve API 6D

GLOBE VALVES

Versions:
→ Cast globe valves
→ Forged globe valves
→ 3-way globe valves
→ Y-type globe valves
→ Quick closing globe valves

CHECK VALVES

Versions:
→ Check valves, cast/forged
→ Swing check valves, cast/forged
→ Check valves wafer-type
→ Swing check valves wafer-type

ACTUATORS

Versions:
→ Electric
→ Hydraulic
→ Pneumatic
→ Gas over oil

SPECIAL VALVES

Versions:
→ Piggable valves
→ Nozzle check valves
→ Safety valves
→ Sight glasses
→ Steam traps
→ Mud valves

BALL VALVES

Versions:
- One-pc floating ball valves
- Two-pc floating ball valves
- Three-pc floating ball valves
- Soft sealing
- Metallic sealing
- Top entry
- Fully welded
- 3-way ball valves

BUTTERFLY VALVES

Versions:
- Concentric butterfly valves
- Double off-set butterfly valves
- Triple off-set butterfly valves

STRAINERS

Versions:
- Strainer Y-Form
- Pot strainer

APPLICATION AREA

- Gas
- mechanical engineering
- chemistry
- Industry
- Oil
- Power plants
„From experience of more than 1,500 completed projects we know that quality is the key to success."

As a recognised partner of international plant engineering firms we feel an obligation to continuously optimise quality. Our quality management system starts with the purchase of valves.

**All production processes** conform to international quality standards monitored constantly. We can therefore guarantee compliance with the individual national and industry-related **quality requirements of every customer**.

A project-specific quality plan is created on the basis of the current QM system and in compliance with the customer, the manufacturing plants and any other third parties. The quality plan and the relevant guidelines, procedural instructions etc. ensure compliance with the design, quality and inspection requirements of the project.
Quality is our top priority!

Quality for us does not stop at delivery. We support our customers worldwide with the installation and commissioning of plants. The scope of service includes detailed maintenance recommendations and optimised spare parts specifications.
