OPERATION EXCELLENCE

Often, most of vessel engineers are experiencing communication difficulty while getting chemical supplies at the Korean ports. Different to bunker & lube oil supplies, hardly to find the operation support system for caustic soda 50% & Aqueous Urea Solution- Marine Urea (AUS 40) from the most of suppliers in South Korea.

Operation Excellence is the key essential requirement for vessel supplies. With a presence of a professional operation manager for bunkering chemical products (caustic soda, marine urea, MEG, magnesium oxide, etc.) at the supply port, the operation manager of SWG communicates with the vessel directly & leads the bunkering process with operation excellence.

Also SWG prepares extra filling hoses, couplings (female/male), different flange sizes for supply contingency (for bulk supply & pumping is needed).
Certified Products with Quality

Product quality is a important issue to consider as uncertified products often cause critical damage to the equipment & vessel.

SWG only supplies certified Caustic Soda 50% & Marine Urea (AUS40) with ISO 9001 & ISO 14001 certified manufacturers.

For Marine Urea (AUS40), the manufacturers are with AdBlue Certificate and their Urea Solution products are widely applied in Marine, Automotive and Industrial areas.

APPROVED SUPPLIER OF Caustic Soda 50%

Different to Marine Urea (AUS40), Caustic Soda 50% is classified as toxic substance in South Korea and only approved licensed supplier is allowed supply Caustic Soda 50%.

SWG has acquired approved supplying license from Ministry of Environment, Republic of Korea and abundant experience of vessel supplies.
