Foreword from Thomas Fjeld

Nautisk has been supplying maritime charts and publications to the merchant marine since 1896 with a strong focus on the shipping market since its beginnings as the chart division of NHST.

Formerly Norway’s largest distributor of nautical charts and publications, today we are one of the world’s leading agents, serving ship owners and operators from Europe and the US to Singapore and China. Our global network allows us to work with strategic local markets, offering cost effective solutions and timely delivery direct to ships no matter where in the world they are.

As an official distributor for the worldwide hydrographic offices of the UK, US, Norway, Sweden and Denmark, we hold extensive stocks of charts and publications in both paper and electronic formats. Our product portfolio also includes Neptune, our world-renowned vessel information service in addition to PAYS (Pay As You Sail) and PAYS+.

Our global network allows us to work with strategic local markets, offering cost effective solutions and timely delivery direct to ships no matter where in the world they are.

Chief Executive Officer, Thomas Fjeld
Digital Products

We offer a full portfolio of navigational products, services and state-of-the-art solutions to mariners worldwide. We combine our expertise with market-leading products from a number of suppliers.

Admiralty Digital Publications

Admiralty Digital Publications (ADP) are a collection of digital versions of the UKHO’s industry-leading Admiralty Nautical Publications, used by mariners around the world.

Log Books

All Log Books are compliant with the relevant standards for keeping records onboard and contain excerpts of any relevant Regulations.

Paper Products & Services

Paper charts have been both our business and our passion for over 110 years, and our portfolio management service is used by shipping companies all over the world.

Print on Demand

Print on Demand (POD) charts from the United Kingdom Hydrographic Office (covering Admiralty Paper Chart series), Norwegian Hydrographic Service (covering Norwegian waters) and NOAA (covering US waters) are used by increasing numbers of vessels with global sailing routes.

Digital Products

We offer a full portfolio of navigational products, services and state-of-the-art solutions to mariners worldwide. We combine our expertise with market-leading products from a number of suppliers.

Admiralty Digital Publications (ADP) are a collection of digital versions of the UKHO’s industry-leading Admiralty Nautical Publications, used by mariners around the world.

AVCS

The AVCS Vector Chart Service only contains ENC data that meets SOLAS Carriage Requirements for use within Electronic Chart Display and Information Systems (ECDIS).

ARCS

The ARCS Raster Chart Service is a unique, real-time vessel information service that utilises paper and digital products approved by the UKHO, Norwegian Hydrographic Service and PRIMAR, enabling vessels to increase efficiency and stay compliant.

PAYS and PAYS+

Neptune Pay As You Sail enables users to access a complete global portfolio of ENC for use with onboard ECDIS systems, while paying only for those that are actually used during the course of the voyage.

Log Books

All Log Books are compliant with the relevant standards for keeping records onboard and contain excerpts of any relevant Regulations.

Oslo

Nautisk was established in Norway in 1896, and today, Oslo is still home to our global HQ and as such, the central point for all of our operations, from sales and logistics to IT and software development. From this major shipping hub, we are working to make the most of each local office and exploit all the opportunities that each regional market can provide.

Based in Oslo and across the world, our maritime navigational experts act as an extension of the onboard team and are all highly skilled individuals. Together we are developing new ideas and challenging the traditional chart agent role.
The Asia-Pacific region is one of ever-growing importance for the industry, and our customers are working to meet the demands of trading a wide variety of routes. We cooperate closely across our regional network to ensure that we are ready to meet those demands.

ASIA

Singapore/Hong Kong
Situated in one of the world’s largest and most influential maritime and shipping hubs, our Singapore office acts as the HQ for our Asian operations network, which spans Hong Kong and China. Originally one of the first chart agents to open for business in Singapore in 2006, Nautisk now has a team of senior staff and technical experts situated across the region.
Based across the globe in key locations, our team of account managers, sales executives and project managers are all ex-mariners and experts in the field of navigation. Between us, we have sailed the world’s oceans on a range of vessel types from tankers and cruise ships to containers, bulliers and naval vessels.

Worldwide Hubs

[Map of worldwide hubs]
Having worked closely with the UKHO for a number of years, we understand the importance of providing an efficient and cost-effective supply of nautical charts and publications and work closely with customers to ensure a seamless service.
Over the past few years we have seen positive developments across the maritime industry within the US, with solid growth across a number of sectors. Our new hub in Montevideo allows us to meet more of our customers across South America and establish strong relationships with them.
Meet the Family

Dagens Næringsliv

Dagens Næringsliv is Norway’s largest business newspaper. Dagens Næringsliv publishes news, investigative reporting, commentary, analysis and debate concerning Norwegian business and society. They keep a critical eye on the key players and companies in the financial and business sectors.

TradeWinds

TradeWinds is the world’s best selling shipping news provider. Shipping’s major players rely on TW as a source of news and opinion to help them make the right decisions every day.

Their expert journalists combine unparalleled local knowledge with unbeatable global insight and opinion, delivering the latest breaking global news and most incisive independent analysis.

TradeWinds covers the entire shipping sector, from tankers, dry bulk, shipbuilding, containers, finance, offshore, to marine insurance, ship casualties, LNG and piracy.

Today, TradeWinds remain one of the most powerful and influential brands in the industry. Intrafish Media publications will provide the best information for the seafood/fish farming and the fishing industry worldwide through print and online publications, industry meetings and excellent independent journalism.

IntraFish

IntraFish Media has positioned itself as a platform for the publication of important business information. It surpasses the competition in terms of breadth and depth of the self-produced content published in various news media.

Europower

Europower provides quality news and market analysis to players in and around the power and energy industries. It publishes the trade journal Energy, the customer magazine Vår Energi and the website www.europower.com.

Recharge

Recharge is an important provider of news in the field of renewable energy, and is increasingly recognized in many countries around the globe. Recharge has grown to be a global news provider, giving priority coverage to wind and solar. The newspaper, which is circulated to about 10,000 influential decision makers weekly, has paying subscribers in 55 countries and towards the end of the year was visited by approaching 50,000 unique users monthly online.

smartcom:tv

Smartcom:tv broadcasts more than 250 live webcasts a year. Smartcom:tv was established in 2002 and is Norway’s largest and most experienced supplier of live sound and pictures on the Internet.

The weekly newspaper Upstream is the world’s leading paid-for oil and gas industry publication. Upstream’s business philosophy is to generate and distribute quality independent news and insight on the global oil and gas industry through whatever channel — hardcopy, electronic or other — is deemed appropriate, and to do so in a sustainable and profitable manner.

MyNewsdesk is a pioneer in the development of Web-based PR channels for both the mass media and social media. The Web service, on which communicators, media and other interested parties can exchange information, was expanded further in 2011. The basic “Publish” service with its analysis section has now been supplemented with “Network” and “Explore.” These services are a response to customers needing to be able to add influential people in their target groups to their network and communicate with them better.
