Our mission: we keep you going, worldwide.

Located in the heart of Europe’s shipping community, Tullp strives to optimise the maintenance of its customers’ separation and filtration equipment by minimising downtime and reducing operational costs. We offer the best spare parts through an unprecedented reverse engineering programme, hold a comprehensive range of stock for quick and reliable delivery and have a good solid Dutch mentality, where a personal approach and high levels of service comes first.

Engineering Dutch Quality
The key to ship management is to increase the running hours between scheduled maintenance and minimise the downtime, therefore at Tullp we believe that reducing operational costs should not compromise the quality of your vessel.

As a leader in separation and filtration technology, we understand the problems and difficulties your engineers face during the overhaul and maintenance of your equipment. Our goal is to set new quality and durability standards, to help you achieve optimal efficiency throughout the lifecycle of your separation and filtration equipment.

Tullp focuses on producing a wide range of spare parts for separators, triple screw low-pressure pumps, back flushing filters, plate heat exchangers and fresh water generators. Our fully automated in-house supply chain gives us total control over product quality and ensures full traceability of our spare parts, from raw material to final product. As we are an independent Dutch brand, we can guarantee outstanding, unparalleled quality and offer an 12-month manufacturing guarantee to our customers.

At Tullp we continually optimise our product portfolio, creating an extensive range of stocked items. This offers the most comprehensive range of spare parts for separation and filtration equipment and is therefore always able to meet your requirements. By producing locally, we can supply globally.

The unique combination of knowledge, unprecedented reverse engineering and our fully automated in-house supply chain enables us to supply high-quality products, specific and reliable maintenance solutions that will help you increase the running hours between scheduled maintenance and reduce operational costs, improving your bottom line.

Set a new course: Tullp, your separation and filtration team.

The MaxAssist programme supports our customers throughout the year with on-site servicing and repair and year-round consultancy. Our engineers have received both mechanical and electrical training. The Tullp workshops also perform in-house inspections, repair and rebalancing services on all types of separator bowls. The Tullp workshops also overhaul complete separators.

MaxAssist

The MaxAssist programme supports our customers throughout the year with on-site servicing and repair and year-round consultancy. Our engineers have received both mechanical and electrical training. The Tullp workshop also performs in-house inspections, repair and reconditioning services on all types of separator books. The Tullp workshop also overhauls complete separators.

The separation & filtration team

We're an independent brand. Therefore we can meet your requirements.

Separator spare parts
- Spare parts for the entire scope of Alfa Laval and GEA Westfalia separators.
- Complete new and reconditioned separators and bowls.

Freshwater generators
- Complete scope of spare parts for Alfa Laval JWP 16/26/36 freshwater generators.
- Titanium plates and gaskets.

Heat exchangers
- Complete branded CBM 36, 76 & JWP heaters.
- Plates (Titanium and stainless steel) and gaskets for all major brand heat exchangers.

Pumps
- Complete scope of spare parts for mechanical and magnetic IMO low pressure pumps (ACD, ACE, ACP, ACG, LPD, LPE, ACF).

Back flushing filters
- Filter elements for Moatti back flushing filters FM 150/152/180/280 & T160.
- Complete scope of spare parts for Moatti back flushing filters.

Engineering Dutch Quality

Reverse engineering is the strength and foundation of our company. Our research and development department defines the natural, dimensions and measurements of every single part. Using precise measuring equipment and CAD/CAM software, we create our own technical drawing. By relating to the latest and innovative manufacturing systems, we maintain a fully automated in-house supply chain. Therefore, when overhauling your equipment, look out for the Tullp quality label and realise unsurpassed precision. Tullp, high-quality, ISO 9001 certified spare parts.
