VIRTUS GmbH was founded 1977 in Hamburg and taken over by Rolf Klaeke in October 1991.

In 2004 an office building and warehouse with workshop was established at the location Osten.

Today 24 people are employed by VIRTUS GmbH - purchasing + sales staff as well as project engineers + service technicians.

Our core business is engineering + project consultancy and storage + distribution of significant spare parts to industries, yards, owners, operators and ship suppliers.

Other major activities are delivery, installation, engineering, service and repair of waste water and vacuum sanitary systems, wet and dry waste treatment plants, pump units (Azcue), HFO-booster, pre-heating and transfer units, fuel handling systems (Auramarine) and stainless steel push-fit pipe system (Blücher) as well as ballast water treatment systems.
