Oil-only Absorbent Pads
Because everyone needs a pad!

**[ FEATURES ]**
- Specialized for oil and other petroleum-based spills; repels water
- Floats on water and remain intact even when saturated with oil
- Quick ability to soak up high volumes via Absorption & Adsorption Technology
- Stable for prolonged storage; temperature and humidity resistant
- Replaces messy and wasteful conventional cleaning methods
- Incinerated to less than 0.02% ash. High BTU value, 22,000 BTUs per round
- Melt-blown Polypropylene Construction

**[ APPLICATIONS ]**
- Light-weight, pre-cut pads used for absorbing leaks, drips and spills
- Commonly used to skim oil spills off water surfaces
- Place pads around machinery, under leaky pipes of fittings, in messy traffic areas, or anywhere you need to ensure your facility is clean, safe and compliant
- Also ideal as wipes for daily maintenance and repair operations to remove unwanted working fluids on machinery and equipment
- Applicable for both indoor and outdoor environments

Universal Absorbent Pads
Because everyone needs a pad!

[ FEATURES ]
- All-purpose absorbents that absorbs all industrial fluids (water-based and petroleum based)
- Industrial gray colour masks fluids spill, enabling longer usage and maximum utilization
- Quick ability to soak up high volumes via Absorption & Adsorption Technology
- Stable for prolonged storage; temperature and humidity resistant
- Replaces messy and wasteful conventional cleaning methods
- Incinerated to less than 0.02% ash. High BTU value, 22,000 BTUs per round
- Melt-blown Polypropylene Construction

[ APPLICATIONS ]
- Light-weight, pre-cut pads used for absorbing leaks, drips and spills
- Universal absorbency makes it versatile for almost all types of industrial spills
- Place pads around machinery, under leaky pipes of fittings, in messy traffic areas, or anywhere you need to ensure your facility is clean, safe and compliant
- Also ideal as wipes for daily maintenance and repair operations to remove unwanted working fluids on machinery and equipment

Haz-Mat / Chemical Absorbent Pads
Because everyone needs a pad!

[ FEATURES ]
- Pads are surfactant-treated to become chemically inert to handle aggressive fluids
- Hi-visible green colour for clear identification of hazardous materials spillage
- Quick ability to soak up high volumes via Absorption & Adsorption Technology
- Stable for prolonged storage; temperature and humidity resistant
- Replaces messy and wasteful conventional cleaning methods
- Incinerated to less than 0.02% ash. High BTU value, 22,000 BTUs per round
- Melt-blown Polypropylene Construction

[ APPLICATIONS ]
- Light-weight, pre-cut pads used for absorbing leaks, drips and spills
- Chemically inert pads specifically designed for hazardous and aggressive fluids spillage
- Place pads around machinery, under leaky pipes of fittings, in messy traffic areas, or anywhere you need to ensure your facility is clean, safe and compliant
- Also ideal as wipes for daily maintenance and repair operations to remove unwanted working fluids on machinery and equipment
- Ideal for environments where hazardous chemicals and aggressive fluids are involved

Absorbent SOCs are flexible tubes that contain and absorb liquids. SOCs mold around corners and conform to uneven surfaces to soak up spills and drips, preventing fluid from escaping to other areas. Tough, chemical resistant polypropylene cover resists chemicals and tearing and holds fluids within, even when saturated.

**Applications**
- Usable for any indoor, outdoor and/or hazmat application.
- Due to its flexible nature, Absorbent SOCs usually serve to barricade a spillage area to prevent the spill from spreading (e.g. wrap around bases of machinery, covering corners, lining along drain edges to prevent spill from entering drainage, etc).

**SPILL ABSORBENTS**

**Spill Absorbent Pillows**

Too big a spill and too many pads to manage?

**[FEATURES]**

- Absorbent Pillows have higher capacity, larger surface area and great capillary abilities to soak up fluids quickly.
- Tough, chemical resistant polypropylene cover resists chemicals and tearing and holds fluids within, even when saturated.
- Compact design fully packed with absorbent filler with UVA resistant cover.

**[APPLICATIONS]**

- Usable for any indoor, outdoor and/or hazmat application.
- Ideal for potential high capacity spillages or catching persistent point-leakages (e.g. collection, reservoirs, and troughs, underneath pipelines or valve openings of machines where potential spill surge occurs).
- Pillows can also be placed under Spill Containment Pallets for easy clearing of drips and leaks from storage container above the pallets.

Oil-Skimming Booms
Because oil & water don’t like each other!

[ FEATURES ]
- Absorbs and retains oils and oil-based liquids including lubricants, fuels and crude oil, without absorbing a drop of water
- Tough, chemical resistant outer mesh and inner skin keeps polypropylene filler inside for a lint-free boom with maximum absorbency and outdoor durability
- Booms keep absorbing and stays afloat even when fully saturated and have built-in clips to join booms together for the desired length
- Inner rope gives added strength and enabling easy deployment and retrieval on water

[ APPLICATIONS ]
- Oil-Skimming Booms are used to skim and absorb oil off water surfaces contaminated with hydrocarbons
- Mainly used on offshore spills as oil absorbing barricades to prevent spreading of the spillage and also soak up oil contaminants from the water surface.
