HIGH VISIBILITY SIGNS
Our spreaders can be provided with:
• Highly visible panels to inform the operator about the position of the cones.
• OPEN / LOCKED signs in any language.
• Reflecting stickers in the short sides of the spreader to increase its visibility in dark environment.

LONG TERM GALVANIZED PROTECTION
TEC’s Spreaders can be delivered with a hot dip galvanized coating for extra protection against corrosion. This extra protection guarantees an extra long life for your spreaders.

ALL OUR SPREADER CAN BE PAINTED WITH YOUR CORPORATE COLOURS & INCLUDING YOUR LOGO

EXTENSION CHAINS
To handle open-top containers or containers with considerable deformation. Total length according to customer requirements. CE certificate included.

FCL TRANSPORTABLE
All TEC CONTAINER Spreaders can be produced demountable in order to reduce transport cost as the spreader can be shipped in a standard ISO Container. Clear instructions about mounting at site are delivered together with the spreader.

GUIDES / FLIPPERS
Very useful to facilitate approaching maneuvers of the crane driver to the container. A full range of flippers with different characteristics are available upon request.

FORKLIFT POCKETS
The easiest way to move and store the spreader when it is not in use. Unless indicated otherwise, all TEC CONTAINER Forklift Pockets are to be used only when the spreader is not loaded. Pockets are valid only for transport purposes.

LOAD TEST
All our Spreaders are delivered with a CE certificate. If a third party inspection is requested TEC could provide a Bureau Veritas “LOAD Test Certificate”.
