CASTLE PUMPS LTD

Industrial Pump Solutions

Castle Pumps Ltd
the UK agent of Azcue
Azcue Pumps have over 100 years’ experience in the manufacturing of pumping solutions for applications involving water, chemicals, fuels and lubricants.

We know how important it is when sourcing a pump for an industrial process that you can be confident in its operation, that you won’t be impacted by costly downtime and repairs, and that you have a robust proven solution right for your application. Azcue pumps are third party approved by Lloyds ensuring a quality level that you can rely on.

Why choose Azcue?

- Own foundry ensures complete production control
- Fast track production available on selected models
- Assured quality through 100% pump testing regime
- Type approved and available with third party witness certification by Lloyds, ABS or Bureau Veritas. Others available on request
- Complete pump packages from one manufacturer with a single warranty
- Guaranteed supply of spares for any model for a minimum of 15 years from discontinuation
- Interchangeable spares reduces stock holding
- ATEX approved models for hazardous applications
- Pumps to DIN24255 for retrofitting into existing pipework

Castle Pumps Ltd
Azcue UK agents

Castle Pumps Ltd are the UK agent for Azcue Pumps, carrying over 90 pumps in stock, with associated spares.

We assist with specification and design for both new and replacement pumps. Due to the vast range of pump technologies, performance ranges and applications, selecting a pump can be complex. With 10 years’ specialist experience we have the technical knowledge to specify a proven solution. This combined with our maintenance facilities ensures we are your dependable partner.
Options include; open impellers for handling soft particles; closed impellers for high efficiency and volatile fluids; vortex impellers for stringy solids and debris; cutter impellers for cutting up large amounts of solids; and mixed flow impellers.

Material choices
We offer pumps in a full range of materials, selected in accordance with the duty and liquid being pumped. Azcue's own foundry ensures the ability to cast in Cast Iron GG25, Ductile Iron GGG40, Bronze, Aluminium Bronze, Stainless 316 and Duplex.

Drive options
We can supply electric motors in a multitude of voltages such as single, three phase and high voltage, in both 50 and 60Hz. We can also offer hydraulic, air or engine driven pumps.

Technical considerations
Spacer coupling
Can be fitted to vertical pumps to ensure that wearing parts can be replaced without having to remove the motor.

Back pull out design
Enables the motor to be removed without disconnecting the pump from the pipework.

Magnetic coupling
Removes the need for a mechanical seal eliminating the chance of leakage and reducing service intervals.

Priming options
Azcue offer both air ejectors and electric priming pumps for applications where a short priming time is required, or where it is not possible to keep the suction flooded.

For quick lead times and to help you out in emergency situations, we offer a range of pump models and spares from stock.

Whatever the process, we have the pump
**Vertical Inline Centrifugal**

**LN** Close Coupled, based on DIN 24255
- Max Head: 100m
- Q Max: 700m³/h
- Max Temp: 120°c
- Ports: DN 50-250

**VM** Close Coupled
- Max Head: 130m
- Q Max: 1000m³/h
- Max Temp: 120°c
- Ports: DN 50-150

**CM** Close Coupled, Spacer
- Max Head: 130m
- Q Max: 1500m³/h
- Max Temp: 120°c
- Ports: DN 50-250

**LD** Long Coupled, Split Casing/Double Suction
- Max Head: 60m
- Q Max: 5000m³/h
- Max Temp: 120°c
- Ports: DN 300-400

**VR** Close Coupled, Ball Bearing
- Max Head: 130m
- Q Max: 1500m³/h
- Max Temp: 120°c
- Ports: DN 80-250

**VB** Long coupled
- Max Head: 190m
- Q Max: 2000m³/h
- Max Temp: 120°c
- Ports: DN 150-250

**VA** Long Coupled, Axial Suction
- Max Head: 190m
- Q Max: 2000m³/h
- Max Temp: 120°c
- Ports: DN 150-250

**SPECIAL EXECUTIONS**
- Max Head: 190m
- Q Max: 2000m³/h
- Max Temp: 120°c
- Ports: DN 150-250

**VRX** Vortex Impeller
- Max Head: 30m
- Q Max: 500m³/h
- Max Temp: 100°c
- Ports: DN 50-200

**BTR** Cutting Impeller
- Max Head: 10m
- Q Max: 80m³/h
- Max Temp: 80°c
- Ports: DN 125

**VSS** Based on DIN 24255, for Lube Oil
- Max Head: 100m
- Q Max: 700m³/h
- Max Temp: 100°c
- Ports: DN 32-150

**VST** Based on DIN 24255
- Max Head: 80m
- Q Max: 2000m³/h
- Max Temp: 100°c
- Ports: DN 250-350

- Solid Handling: Up to 25mm
- Ports: DN ⅜”-4”

**SUBMERSIBLE**
- Max Head: 178m
- Q Max: 4800m³/h
- Max Temp: 95°C
- Ports: DN 15-610mm

**PISTON**
- Max Head: 6900m
- Q Max: 300m³/h
- Max Temp: 115°C
- Ports: DN ⅞”-3”
Accredited to enable you to buy with confidence.

Why choose Castle Pumps?

✓ Over 10 years of technical expertise and application experience.
✓ Single source supplier for all pumping solutions and genuine replacement parts.
✓ More than just pumps - we offer valves, meters, control panels & bespoke pump kits.
✓ We can provide 3.1 Material Certification, Certificate of Conformity, 2.1/2.2 Declaration of Compliance/Statement of Compliance and Certificate of Origin; and for export, EUR1's and attested invoices.
✓ Pumps are packed to ISPM15 as standard.
