Meson double eccentric high performance butterfly valves are used for demanding applications in e.g. chemical tankers. Valve bodies and discs are mainly different grades of stainless steel. Available with exchangeable metallic or PTFE seats with fire safe approval.

Meson butterfly valves are available from stock as wafer/lug/flanged type, in sizes from DN32 to DN700. We offer high quality valves with bodies in nodular cast iron, cast steel, stainless steel and aluminum bronze. Disc material is available in aluminum bronze, stainless steel, duplex or special alloys. Other sizes and materials can be offered upon request.

BUTTERFLY VALVES

RUBBER LINED & HIGH PERFORMANCE TYPES

DIN/ISO, JIS & ANSI STANDARDS

DESIGNED FOR DURABILITY IN DEMANDING APPLICATIONS

MARINE
INDUSTRIAL
OFFSHORE
NAVY

SANDER MESON group
Meson rubber lined butterfly valves are designed and manufactured for tough and demanding applications. All types of valves; wafer, lug or double flanged, are produced according to the same design principles:

- Available up to PN25 for lined centric butterfly valves
- High tensile strength spindle material with superior corrosive resistance
- Disc retaining pins of Duplex quality
- Vulcanized rubber liners with integrated double O-rings for ultimate media to spindle sealing
- Standard top flange for easy and safe fitting of gearbox or actuators
- Endurable epoxy coated valve body
- Cast in Class approved foundry
Meson offers butterfly valves with a wide range of body/disc/seat materials for different applications.

Valve body materials:
- Cast iron
- Nodular cast iron
- Cast steel and stainless steel
- Aluminum bronze

Disc materials:
- Aluminum bronze
- Stainless steel
- Duplex and other special alloys

With lining of:
- NBR
- EPDM
- Viton
- PTFE, including encapsulated disc
- Abrasive resistant solutions for brine, cement and dredgers
WHEN YOU CHOOSE MESON, YOU HAVE CHOSEN

A QUALITY PRODUCT

Valves are produced and tested to meet the high requirements given by the Class Societies and International standards. Relevant 2.2, 3.1 or 3.2 - certificates are delivered together with the products upon request.

Meson is approved by DNV, LR, RINA and RMRS to issue product certificates on their behalf.

This arrangement gives Sander Meson a high level of flexibility and ability to meet short delivery times in order to assist our customers. We have 24h service availability at +46 733 00 45 11 and can arrange the complete logistic solution. For more details about a specific product, always refer to the relevant data sheet identified by the 6-digit product code. Data sheets are available from the Sander Meson web page www.sandermeson.com.

Pressure testing of DN700 double flanged butterfly valve for sea water intake
