

## CMT Potable Water Questionnaire

1. Name the two groups of hazardous elements which water can contain.
  - ☐ A - Microbes
  - ☐ B - Oxygen
  - ☐ C - Organic & inorganic substances
  - ☐ D - Minerals
2. Which document defines the details of testing required for potable water onboard ships?
  - ☐ A - Ships Sanitation Certificate
  - ☐ B - Guide to Ship Sanitation
  - ☐ C - Classification rules for fresh water handling
  - ☐ D - Company procedure
3. Which source of contamination poses the greatest threat for potable water?
  - ☐ A - Water supply from shore
  - ☐ B - Water making plant onboard the vessel
  - ☐ C - Microbial contamination from human excreta sources
  - ☐ D - Galley waste
4. Name the recommended parameters to be monitored.
  - ☐ A - E.coli and coliforms
  - ☐ B - Aesthetic parameters
  - ☐ C - Disinfectant residual
  - ☐ D - Heterotrophic Plate Count (HPC)
  - ☐ E - Corrosion related contaminants
  - ☐ F - Turbidity and colour
5. The ship owners duties culminate in the creation of a plan to handle all duties. What is the name of that plan?
  - ☐ A - Guide to Ship Sanitation
  - ☐ B - Water Safety Plan
  - ☐ C - Water emergency Plan
6. Name the key elements of the plan.
  - ☐ A - System assessment
  - ☐ B - Cleaning regime
  - ☐ C - Operational monitoring
  - ☐ D - Management and communication

7. Where can you find the relevant limits of the tests?
- ❑ A - Guide to Ship Sanitation
  - ❑ B - CMT Logbook
  - ❑ C - MLC 2006 Regulations
  - ❑ D - CMT Instruction Manual
8. Test intervals vary with your risk onboard. As recommended good practice: When do you should test?
- ❑ A - Sanitizer every week minimum
  - ❑ B - Sanitizer monthly
  - ❑ C - Bacteria every week minimum
  - ❑ D - Bacteria every month
9. What action is required if a specific bacteria strain is being found?
- ❑ A - Inform the port authority
  - ❑ B - Immediate disinfections
  - ❑ C - Dispose the water completely
  - ❑ D - Dispose half of the remaining water and fill up with shore water or water from water making plant
10. What are the typical sampling points?
- ❑ A - Storage tanks
  - ❑ B - Furthest outlets
  - ❑ C - Lowest outlet
  - ❑ D - Outlet at random
  - ❑ E - Outlet in Master Cabin
  - ❑ F - Closest outlet to water making plant
11. How do you ensure a good potable water quality?
- ❑ A - Using only bottles water for drinking
  - ❑ B - Prefer water supply from shore instead onboard water making
  - ❑ C - Regular potable water monitoring
12. Where do you record the test results?
- ❑ A - Potable Water Test Logbook
  - ❑ B - No records required
  - ❑ C - Record in engine log book if records exceed limit.
