SHIP SPARE PARTS

LINSON

LINSON Marine is one of world's leading technology company in the global marine, and solution provider of ship supply chain. Our service includes ship spare parts, ship safety inspection, repairing service, marine engineer service, import and export trade, marine materials logistics transportation. We are dedicated to help the global ship management companies and ship owners to reduce the operating cost, improve operational efficiency, and increase sales performance. Based on more than 20 years of innovation history, LINSON is constantly promoting the innovation of ship services, and composing the future of the industry standardization. Our business is located in more than ten countries and regions around the world. LINSON has integral business activities in China, including warehousing, manufacturing, sales and engineering services.

LINSON
Sustainable Development

Linson's goal is to continuously improve the navigation environment and promote green and sustainable development of shipping for the national/regional ship owners we serve.

To achieve these goals and promote sustainable development, Linson strives to find a balance between providing better service and environment protection, so as to benefit all stakeholders.

LINSON attaches great importance to sustainable development in every aspect, including how to provide high-quality spare parts to reduce the replacement frequency of spare parts, provide one-stop service to reduce the cost of shipping, as well as how to reflect our responsibility in the provision of services and interact with ship owners. In addition, LINSON is committed to excellence in occupational health and safety.

LINSON Spare Parts

LINSON continuously optimizes and adjusts the company personnel allocation to improve our office efficiency and quality control. We have passed the ISO 9001 quality system.

ISO Quality System Certification

LINSON can provide the most of the original spare parts from China, while facing the increasingly severe shipping environment, LINSON provides OEM spare parts to the market, we constantly optimize the supplier channels, purchase products from the terminal manufacturers, reduce purchasing cost, meanwhile improve and control the products quality, to save the procurement cost and time cost for our customers.

We purchase certified spare parts in bulk such as NBR, DAROS, brand-name piston ring, MIBA bearing bush, NICO, SANYO, OMT, L'ORANGE nozzle, spindlguide, oil pump assembly, MAHLE intake exhaust valve stem and other products.

Piston Ring

Linson provides the piston ring for the ship from Japan and Germany, the brands include NPR, GOETZE, DAROS; which cover the entire main engine models. They are made of cast iron and alloys by using the latest technology, and also have the maximum performance through high quality coating. With chrome ceramic layer and chromium nitride, PVD coating piston ring has the very small abrasion and lubricant loss, showing high wear resistance. Linson large purchasing inventory reduces the procurement cost, and shortens the supply time.

Nozzle and Needle Valve

OMT Nozzle and needle valve is widely used by MAN, WARTSLIA two stroke diesel engines. Advanced material and processing technology make the product more stable and durable. Linson has a large stock of this brand.

Gear

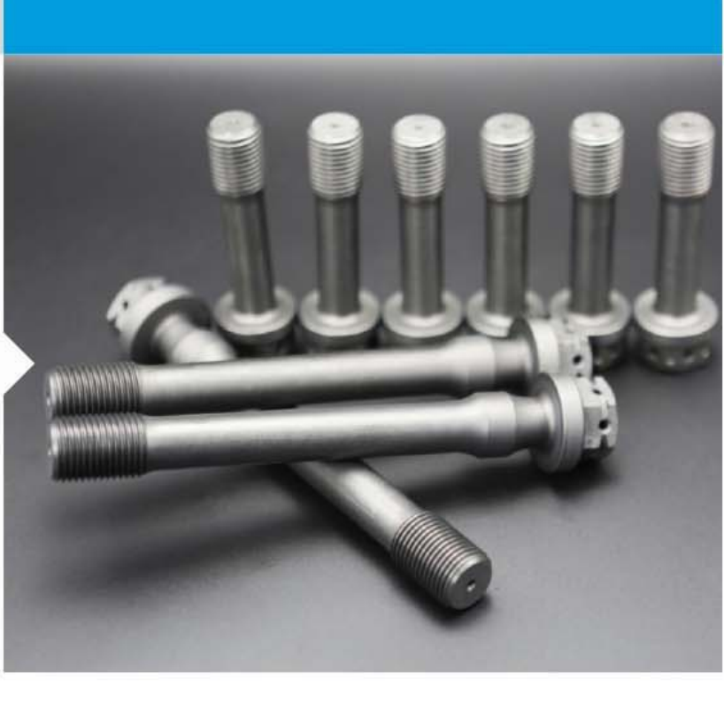
We could provide the original gear as well as OEM gear. The manufacturers are all from well-known OEM factories in China, which greatly shorten the supply cycle while reducing the procurement cost.

Cylinder Seal

Linson is the only supplier who provides NOK cylinder seal, HYDAC valve, and Parker hydraulic tubing for customers, mainly for bulk cargo ship-owners, to replace the original hydraulic products.

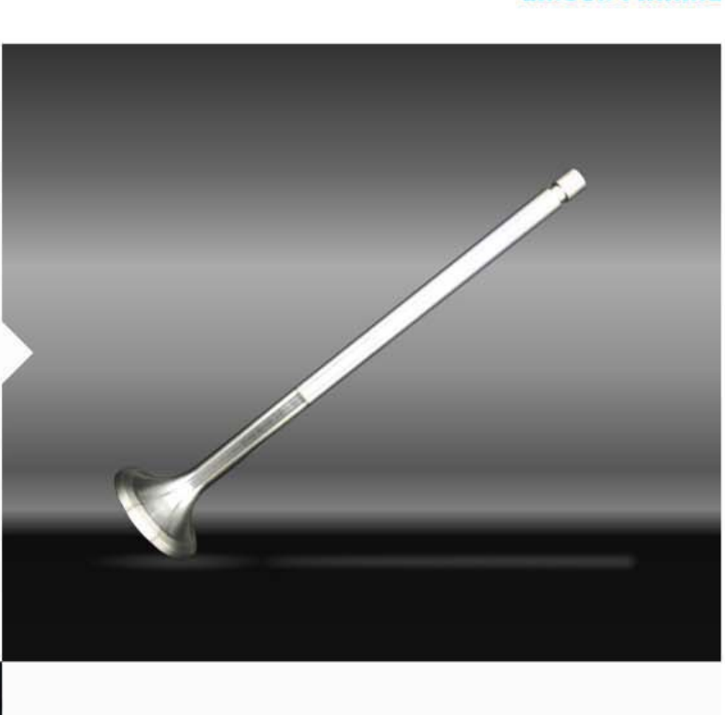
Connecting Rod Bolts

The connecting rod bolts we provided are from the original factory. In ensuring the quality of the product, the safety of ship owner's machine is also adequate protected.



Air Release Valve

The inlet and exhaust valves of MAHLE can be forged and hot extruded shapely, to harden, quench, nitride or chroming the surface of the products. Using NI80 material can withstand extremely high ignition pressure or temperature.



Plunger

Linson purchases the world brand-name plunger and nozzle spares, including NICO, SANYO. HEARTMAN, L'ORANGE. Advanced processing technology and excellent material make the product more stable and durable.

O-RING

All the O-RINGS we provide are made of Dupont materials, which is more resistant to high temperature and oil as well as more durable.

MARINE ELETRICAL MOTOR

Spare Parts

LINSON is the world's leading integrated supplier of marine spare parts. Its subdivisions mainly include main engine, generator, oil separator, boiler burner, pump, valve, hatch cover, crane, emergency generator, air compressor, marine electrical appliances etc.
