

Our service

Your benefit

HANSA-FLEX is Europe's leading systems supplier for all hydraulic requirements. The wide range of products and services make HANSA-FLEX a valued partner to companies in across all industries.

As a full-service provider, we supply our customers with everything they need from a single source: From standard hose assemblies and tubes to power units, hydraulic components or metal hoses. We support our customers through every phase of their projects: From the engineering and prototyping to project planning, installation and commissioning.

Partners in original equipment

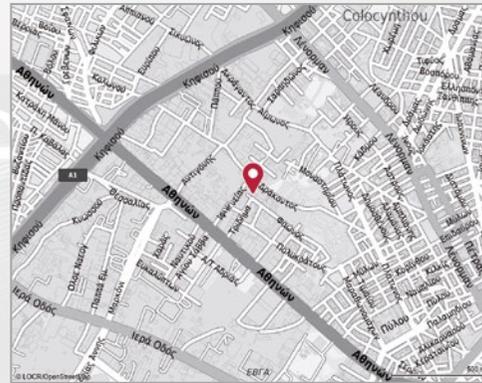

Original equipment manufacturers already benefit throughout the design and engineering phase: From rapid completion of product samples and prototypes all the way through to volume production, including the necessary documentation. Upon request, we will set up consignment warehouses or deliver pre-assembled structural components just-in-time to the assembly line.

Spare parts service without delay

For the replacement of hydraulic components we are at your service around the clock. With our rapid hydraulic service, the part you need is assembled on-site and installed immediately. Thanks to our tight-knit network of branches, our customers all over the world have access to this offering – personal, fast, and reliable.

Always close to our customers

Everything around hydraulics

Through our tight-knit network of branches we are always close to our customers. We offer the complete range of hydraulics: from the standard replacement of a hose line to powerful hydraulic cylinders – everything from a single source.

HANSA FLEX

System Partner for Hydraulics

Everything from a single source

HANSA FLEX

Products

Hydraulic hoses

Hose lines in all nominal diameters and for every field of application

Hydraulic steel tubes

Precision tubes conforming to DIN 2391, deliverable as single items or in series

Hose fittings

Comprehensive range of fittings in stock, custom designs at very short notice

Fittings

Wide range of fittings and adapters for optimum flow conditions

Couplings

Available immediately from stock: couplings for every conceivable purpose

High pressure flanges

Many designs in all standard alloys permanently in stock – up to 6,000 psi and higher

Mounting technology

Deliverable materials: Polypropylene, polyamide, solid rubber and aluminium

Measuring systems

Extensive range of measuring systems for fluid technology – analog or digital

Hydraulic components

More than 4,500 components available from stock – supply of ready-to-install groups

Metal & PTFE hoses

Special hose lines for solid, liquid and gaseous media

Bellows & expansion joints

Stainless steel and rubber, standard or custom design for your requirements

Industrial hoses

Hoses, fittings, couplings for industrial applications in many sectors

Preformed hoses

Many standard sizes ex warehouse, custom designs for all geometries

Hydraulic cylinders

Many variants available in standard inventory, custom designs at short notice

Hydraulic seals

Over 8,000 sealing systems in stock, custom designs available at short notice

Power unit manufacture

Innovative solutions in hydraulic drive and control technology

Filtration

Filter technology ensures a smooth operation of plants and machinery

Pneumatic

Complete compressed air range of about 17,500 articles

Services

Rapid hydraulics service

Full-service mobile rapid hydraulics service – contactable at no charge, any time

Fluid service

Professional consulting and oil care, provision of filter systems and elements

Industrial assembly

Scheduled activities to avoid unscheduled stoppages

Cylinder repair

Manufacturer-independent repair of cylinders, pumps, motors and valves

Workshop containers

Mobile workshop containers for extreme application areas

Plant-in-plant production

Production facility at the customer's site – perfect synchronisation, rapid response times

Kanban & Kitting

Structured inventory maintained at customer's site – pre-assembled sets, ready-to-install

Scanner solutions

Production flow control based on actual material consumption

Series production

Manufacture of hose series in large quantities for OEMs worldwide

Technical consulting

Individual solutions tuned precisely to the needs of our customers

Engineering & Project planning

Planning for entire hydraulic systems – all from a single source

Customer training

Broad seminar programme around hydraulics, also conducted at customer's site

Hose Management

Encoding of hose assemblies – regular inspections and rapid spare part supply

Online-Shop

24/7 easy shopping, 80,000 items in stock: www.hansa-flex.com/shop
