FIRE ALARM SENSOR TESTER

Fire Alarm Sensor Tester is able to test smoke sensors, heat sensors and also flame sensors. The Tester has additional three pieces bar toadjust the length of tester up to 2,5 meters.

➡ FLAME SENSOR TEST

Flame sensors can be tested when the button is at the top position. The cover of the head must be dismantled to trigger flame sensors.

➡ SMOKE SENSOR TEST

Smoke sensor can be tested when the button is at the middle position. The nozzle produces smoke during testing.

➡ HEAT SENSOR TEST

Heat sensors can be tested when button is at the lower position. The nozzle provide some heat to trigger heat sensors.
