“ We are
b o n d e d
t o g e t h e r . ”

Dearest friends and valuable customers,

I know that everybody is concerned today with the wind of change and our experience shows that we can only meet our strategic goals if we manage the 'service side' of the changes we are implementing as part of our strategic plan. With change management we believe we can develop the specific needs of our clients by driving the speed of communication and action of the changes we are forcing. With this aim we changed our logo which has followed us for 32 years long and our web-site. But we haven't changed our visions and objectives, nor we changed our principles in the way we make business.

Our aim is to be a company which sustains and enhances the way we cater to your demands and expectations to provide new values which can respond to any changes with excellence. This year will be for us a year of change and renewal, where we will have to reposition on the supply market and open up to our customers to give a tailor-made service. We will be also extending our services to meet your demands in all ports of the world, from the mains to the most secluded ones. I can assure you that we will pursue under our new banner our efforts to take all the necessary steps to get the best results for your satisfaction.

I would like to thank our old time customers for supporting us since so many consecutive years and all the newcomers, for the trust you shown us and our works. During all those years we have learned how to collaborate together hand in hand, acquiring day by day a mutual trust and understanding. We are grateful to have you all as our clients and I hope that we will maintain this trustworthy business relationship for several years more.

We count on your supports to keep on growing up and to serve you better.

Sincerely yours,

George Saris
President

Provision

“Rely on us with confidence”

Services

While serving our valuable customers, we acted as a pioneer to deal with many challenges of operations in a constantly developing industry in Turkey. In order to provide better quality with more reasonable prices, we have been the first company to introduce transit warehouse and helped in great extend to the ship supply market. Turkish ports are to be considered as the most advantageous supply ports international. The quality of our service is not only shown on ISO 9001-2008 & ISO 22000:2005 certificates, but mostly by an increasing amount of new customers.

Members of

We offer a wide range of fresh, frozen and dry provision to meet the expectation of quality for cargo, navy, cruise, and offshore industries. We source our products from all over the world adding a touch of freshness from Turkey. Our awareness of all standards, strict hygiene rules at all level throughout the supply chain will be implemented at every step. The frozen products are loaded from our conveniently located warehouse cold rooms and delivered directly to the vessels with our frigorific trucks, without breaking the cold chain, at the ports and anchorage areas of Turkey. We have a surface storage capacity of 3000 sqm out of which approximately 1000 sqm reefer storage.

“Save time and money by focusing on more vital operations and let us support you on more routine works.”

Worldwide Supplies

“Take the advantage of the best prices even at the rarely visited ports by utilizing our growing purchasing pool.”

Our efforts are focused on improving our distribution network in the domestic market and especially in the worldwide market. We want to raise our customer's satisfaction up to the maximum level by serving and supplying them worldwide in their preferred channels. Technological developments in communication enable us to interact quickly and this will help us to serve you worldwide.

ATLAS WORLDWIDE is your solution maker for all your supplies and technical supports.

- Take the advantage of the best prices even at the rarely visited ports by utilizing our growing purchasing pool.
- Save time and money for your organization by focusing on more vital operations and let us support you on more routine operations such as supply of provisions and consumables.
- Get the assurance that your fleet will be served on time, less the cost and the harassment due to lack of communication with other suppliers.
- Using Atlas **One-Stop-Shop** system you will reduce operational cost effectively. We work closely with our resources to make sure that the correct product is chosen and we handle all of the orders and survey the route so that you can simply give us the details of the shipment and we take care of the rest.

Why Supply in Istanbul?

The ultimate advantages of supplies at Istanbul Transit are:

- Fast, safe and efficient operations without causing any delay to your vessels.
- Minimal transportation costs due to the unique logically convenient location.
- Availability of all types of products within a close reach.
- Modernized customs regime has eased the transit applications to help incoming / outgoing spare parts deliveries.
- Supplies to transiting vessels at slow down speed without dropping the anchor or stopping the engines to avoid causing any delay in their navigation program and valuable time.

Key Information Regarding Supply In Transit Operations

All vessels have a waiting time prior crossing southbound or northbound Bosphorus and it is not common for vessels to cross the straight right upon arrival. Waiting time may vary in accordance with vessel's type, vessel's LOA, weather conditions and the number of vessels awaiting for passage from 6 hours up to several days sometimes (specially in winter time for crude carriers over than 200 meters LOA).

If a vessel will drop anchor for any reason other than provisions and stores supply whole delivery is affected at the anchorage area.

- Vessels coming from North (Black Sea): At the northern entrance of Bosphorus channel where vessels are awaiting passage permission from VTS deliveries are not allowed. Deliveries affected at Istanbul road, after vessel's exit the channel 1 NM after the disembarkation of the pilot. While vessel is underway in slow down speed we supply en- route and delivery is completed without stoppage
- Vessels coming from South (Aegean Sea): We always meet the vessels upon their arrival to Istanbul road and more specifically 2 NM south of Sivriada Island (approx 10 NM prior the Bosphorus entrance), which is the drifting area for vessels.
