

MMC INTERNATIONAL CORP.
VAPOR CONTROL VALVES
150 lb. Mounting Flanges to Fit ANSI, DIN, and ISO Standards

Model B (2")
(2" Flange)

Model MB (2")
Model MMB (1-1/2")

Model MBS (2")
(2" Flange)

Model MBS (3")
(3" Flange)

There are five Model B series valves: B (2" original), MB (2" Micro B), MMB (1-1/2" Mini-Micro B), and 2" MBS and 3" MBS (with built-in sampling ports).

All B series valves use a full bore ball valve for positive tank closure.

Flanged ends are standard — 1-1/2", 2" or 3" — with 150 lb. drilling pattern for interfacing with tank or deck stand. Threaded ends — either 1-1/2" or 2", to interface with a threaded pipe — are also available upon request.

The entire valve is 316 SS with Teflon seats and seals, except for a Viton tape seal and bronze cap (stainless steel cap available upon request).

Trimode tank gauging functions (ullage, interface, temperature) and oxygen sensing are possible through all B series valves.

Sampling is also available in 1/3, 1/2 and 1 liter capacity (3" MBS only).

The U/MB valve incorporates the positive shutoff of the MB valve and ease of installation without the need for hotwork. The U/MB valve fits existing hatch covers with customer supplied dimensions.*

The U/MB valve is corrected to zero from 500mm (19.69" which can be adjusted to 20" if necessary).

Sizes available for 4" through 12" ullage hatches.

Model U/MB
Per customer ullage hatch cover dimensions*

Model SD1 (1")
(2" Flange)

SD1 valve is for use with tank sounding and dryness checking devices.
