YACHT SOLUTIONS

BECAUSE

when communication is critical

PUBLIC ADDRESS & GENERAL ALARM

The EXIGO IP Public Address System (IP PA) brings all the benefits of networked audio into one package. EXIGO IP PA is certified for the most stringent safety standards for General Alarm and Voice Evacuation purposes. EXIGO customers span from the most demanding clients in the offshore industry, to hospitals, power plants and the transportation sector. We are proud to be protecting lives and property around the globe, in every environment.

INTERNAL COMMUNICATION

ACM AlphaCom for Maritime

The Vingtor-Stentofon ACM system unites and enhances a vessel's safety systems by providing outstanding onboard communication. AlphaCom XE is a modular platform, supporting IP and analog telephones and networking. This modularity and flexibility results in a product offering of various system packages, which satisfy the requirements of all types of vessels from small, conventional vessels to large, advanced ships.

ZENITEL DELIVERS
SUPERIOR AUDIO FOR
ADVANCED SITUATIONS.

CCTV

Our approved marine CCTV systems enable cost-effective, high-quality area monitoring and video surveillance, enhancing the safety and security for personnel, cargo and the vessel itself. The systems are available in different versions and offer a set of standard and optional features. Many of our clients today are ferry and cruise vessels; however, we are able to deliver complete configurations that assist all types of vessels with use of CCTV systems to further enhance safety onboard.

VINGTOR-STENTOFON OPERATOR

Vingtor-Stentofon Operator, is a Windows-based system management solution for AlphaCom Audio Servers. Through the AlphaCom, it integrates all communication channels in a single interface, which includes interactive map functionality that shows the location and status of all connected communication devices.

Vingtor-Stentofon Operator is both flexible and easy to set up. A library of templates and icons enable you to be up and running within minutes, while its configuration capabilities allow you to customize the system to suit your individual requirements and preferences.
