

REFRIGERATED SPACES AND DRY STORES

**FROM SINGLE UNITS TO
COMPLETE TURNKEY DELIVERIES**

LOIPART IN A SEASHELL

- Specialists in food service, laundry and waste solutions.
- Approximately 200 employees.
- Customers in 62 countries.
- A track record of deliveries on more than 12,000 ships.
- More than 40 years of experience.
- Privately owned.
- The highest AAA credit rating.
- Offices in Sweden, the USA, Korea, Finland and Singapore.
- Agents and representatives all over the world.

HOW CAN WE HELP?

We have a solid experience in delivering refrigerated spaces for storage and handling of food and beverages to the marine market.

CUSTOMER MADE SOLUTIONS

Our custom made solutions for refrigerated spaces are complete packages, including wells, ceiling, shelves doors and fixing devices. There are a number of optional floor coverings available, ranging from stainless steel to ceramic tiles.

ECONOMICAL REFRIGERATION TECHNOLOGY

Precisely measured sandwich elements are fixed tightly with quick- release locks. The advantages of an overall economical structure are easy installation on board and a low thermal insulation capacity that guarantees reduced operating costs. Insulation materials available are polyurethane and rock wool. Polyurethane is a light and efficient insulator that absorbs virtually no moisture. Rock-wool is used in places that require absolute non-combustibility.

CONTINUOUS PRODUCT DEVELOPMENT GUARANTEES THE QUALITY

We are continuously looking for new alternatives in order to provide more fire-safe and environmentally sound products. Similarly, we are developing new, technically and economically better solutions. All our elements are CFC and HCFC free, and the products and structures, including doors, meet the highest USPH requirements.

COLD ROOM DOORS

Loipart has delivered high-quality doors to cold rooms and freezers for several years. All doors are manufactured to meet all the hygiene and health requirements. We use polyurethane or rock-wool for insulation, and efficient sealing assure tightness. The doors are installed in the pre-made openings on-board.

COLD ROOM FIRE-DOORS

An important addition to our door range is A-60 fire-rated door for cold rooms and freezers. Instead of two separate doors, the cold room only needs one door, which makes both installation and use easier. The door have a MED type approval and they are available in three versions; Sliding single, hinged single and hinged double doors.

All our doors take into account the hygiene regulations set for catering rooms: to make cleaning easier, the corners are rounded, and there are no unnecessary gaps that gather dirt.

Cold room doors

Loipart delivers cold room doors from standard models to A-60 fire-rated doors.

All our doors have excellent refrigeration properties; they are tight, easy to clean, and light in use, including fire doors.

IN-HOUSE KNOW-HOW

*Our operations are based on self-sufficiency.
Extensive in-house know-how is the key in managing
demanding projects in a competitive way - often on a
very tight schedule.*

EXPERIENCED HUMAN RESOURCES FOR:

- Galley layout design
- Planning and project management of turnkey catering areas
- Sales and projects of food service marine appliances
- HVAC & electrical planning and installation
- Installation and start-up
- After sales services
- Repairs & conversions

MODERN PRODUCTION PLANTS FOR:

- A wide range of prefabricated products, such as piping and penetrations
- S/s linings, ventilation and duct products, and service hatches
- Customized s/s furniture, hot and cold units
- A-60-class modular pantries
- A-60-class cold room paneling system
- A-60-class fire doors for cold rooms

CFC and HCFC free elements

Our CFC and HCFC free elements can be insulated with efficient polyurethane or non-combustible rock-wool. In the finished cold room, the surface of both elements looks exactly the same.
