LOOK UP TO SAFETY

LOOK UP TO COMAR

U.S.C.G. Approval  
#163.003/4/0.

Distance Between Steps:  
15 or 16 inches

Overall Step Size:  
20" x 4-1/2" x 1-1/8"

## COMAR / WORKBOAT LADDER

- Note same spacing as Pilot Ladder - 12-1/4"
- Using Debarkation Ladder steps
- **USCG approved as a Workboat or Debarkation Ladder (Up to 250 ft.)**
- Steps are secured to side ropes using stainless steel fasteners and patented COMAR Wedge Assembly
- Rope: 2-1/4" circ. (3/4" dia.) 3-strand soft feel polyester over a core of orange ultra strong to eliminate bounce and act as an early warning sign of wear (15,000 lbs. min. breaking strength)
- Step: Buoyant high impact elastomer ultra violet resistant safety orange impregnated, has internal tubular and patented internal collar reinforcement. Top of step has 1/8" raised diamond surface approx. 3-3/4" x 14" coated with non-skid abrasive grit.
- Eliminates marlin seizings (wippings)
- Exceeds 2,000 lb. required test load by 100%

"SOLAS" (V) No joints below the top step

Method of attachment (choose one)

- A. Standard tie rope, 5' - 7' - 10'
- B. Standard thimble splice 24" above top step
- C. 5,000 lb. Double-acting snap hook
- D. Optional heat shrink tubing over the splice

Full line of pad eyes, shackles, hooks, links available.

Deck securing devices shall be rated at 5,000 lbs. minimum breaking strength.
