BULB AND SOCKET ORDERING INFORMATION

For Searchlights 0800 Series – 10", 12", and 14"

Bulbs are not included in lights

To give good results, the bulb and reflector must be perfectly compatible. Therefore, be sure to specify the catalog number of the bulb desired. Peak candlepower is exceedingly sensitive

to many factors, (i.e., a light source out of focus by 1/32 inch, under-voltage of only 4%, or differences between bulb manufacturers can cause a reduction of range of up to 20%).

Please Order Carefully, Bulbs are Not Returnable.

* NOTE: These are the "Rated Average Laboratory Life in Hours" of the Bulb Manufacturer obtained in closely controlled laboratory life testing of groups of lamps at their design voltage. It is not necessarily the same as the service life where conditions such as shock, vibration, voltage fluctuation and environment may result in a shorter average attained life.

ELECTRIC SOCKET AND SUPPORT STAND ASSEMBLIES

Searchlights include a socket and support stand assembly based on the bulb or socket information given when ordering. The following chart makes it possible to order and stock different

assemblies for field conversion, to meet a large variety of voltage and candlepower requirements with a minimum of inventory.
