

DMI Young & Cunningham

Incorporating Dobbie McInnes

Valve Automation and Control

A DMI Group Company

Company History

DMI Young & Cunningham can trace its history back to 1924. The now incorporated Dobbie McInnes has an even longer history starting as a compass maker and later diversifying in to gauging and finally control systems. Throughout this time the business philosophy of the company has been to design, manufacture and offer to market the highest quality product at a competitive price.

Our engineers, technicians and sales staff provide the highest standards of customer service, quality of workmanship and seek to meet our clients expectations at all times.

Markets

Although primarily known for our work in the marine sector we also supply and service the:

**Defence • Oil and Gas •
Power Generation • Distilling
Industry • Pharmaceutical
• Process Industries**

Design

Our in-house design expertise covers all areas of valve design and automation with the ability to offer our clients systems based around hydraulic, pneumatic, electrical and electro-hydraulic power. Our onsite design and technical centre allows us to design and implement even the most complicated systems. This onsite capability enables our Design Engineers and Technicians to liaise on a one-to-one basis providing the best support for our customers. Our engineers also co-ordinate with other departments in the production of project data packs ensuring our clients documentation and certification requirements are met.

Actuated Valves

As a valve manufacture we know the intricate workings of all valve types. This combined with our extensive knowledge of actuation, makes us the ideal company to supply your actuated valve solutions. We can supply any valve type, in almost any material as an actuated unit.

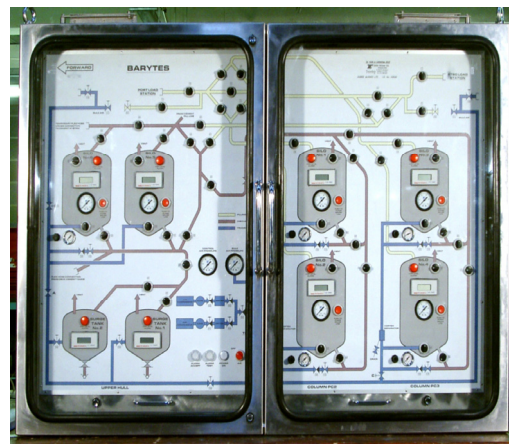

We can supply hydraulic, electric and pneumatic units to meet your requirements. The units can also be supplied with various accessories including limit switches, proportional indicators and visual position indicators if required.

We hold a range of finished items on stock with one-off and special order items available to order.

Control Panels

DMI Young & Cunningham continue to provide visual control panels for our customers in industries as diverse as marine and distilling. We can supply traditionally styled control panels for both the refurbishment of

previously supplied equipment and new installations requiring visual and operational simplicity. The panels can be electrical, hydraulic, pneumatic or a combination. In addition, we can also provide modern fieldbus and PC screen based systems. Our aim is to provide our clients with solutions which best meet their individual

requirements on both a technical and operational level. Please contact our technical sales department for additional details of our products and capabilities.

Aftersales Service and Spares

DMI Young & Cunningham's service department covers all equipment supplied by ourselves as well as third parties.

Our Engineers are fully conversant with all aspects of valves, actuators and control systems. Should an engineer be required we aim to respond within 24-hours. Our spares department can provide quotations for all spares to keep your equipment fully operational. We carry a range of spares on stock for immediate despatch and most others can be obtained and despatched at short notice.

Repair & Service

We understand the importance of customer support and as such maintain our products and installations throughout their working life cycle. As an example we continue to service and repair the Dobbie McInnes range of hydraulic actuators even though they have been out of full production for several years.

Recent Projects

Our client base is very diverse. We have recently worked on supplying actuated valves to the MOD for the refit of several RFA vessels and have supplied several large orders of hydraulically actuated Class 600 ball valves to the oil fields of UAE and Dubai. We have also supplied several actuated PROFIBUS valve chests to the USA Coast Guard (see picture).

Quality

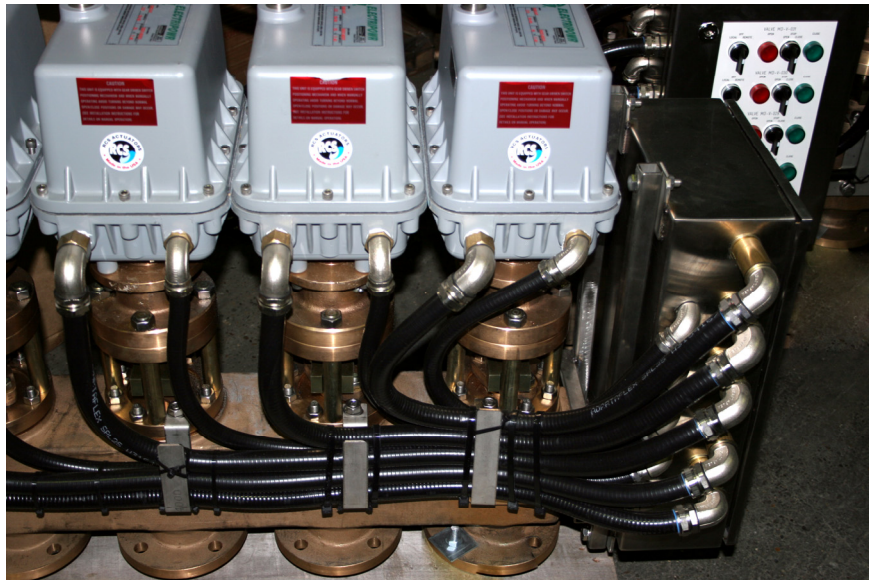

DMI Young & Cunningham Ltd are approved to ISO 9001:2000 by LRQA. Our aim is to achieve total quality excellence through our quality policy of continuous improvement. All Y&C equipment is manufactured, tested and inspected to the highest standards by experienced personnel. In addition we ensure that the Quality Systems of all our suppliers meet the required standard.

Product Range

From a small pneumatically operated ball valve to the complete installation and commissioning of an actuated multi valve controlled system, we have the product portfolio and trained staff to offer the same level of support and customer service.

Actuated Valves ▪ Hydraulic Solenoid Cabinets ▪ Valve Control Panels ▪ Electrical Starters ▪ Hydraulic Power Pack Units ▪ Heeling Control Panels ▪ Valve Position Indication ▪ Bridge Consoles ▪ Alarm and Monitoring Panels

This represents only a selection of our products and capabilities. Our sales department will be happy to discuss any requirements you may have.

Electrically actuated valve chest for USA Coast Guard

Partners

We work with a number of carefully selected supply partners to ensure the products we offer are of the highest possible standard. Many of these companies we have been working with for decades and as a result have gained extensive product knowledge. We continually attend training seminars on their product lines to ensure we remain at the forefront of any technological development and its implementation.
