Life Saving Appliances

When it comes to inspections and repairs of lifeboats and davits, we are the leading service provider in North America and the Caribbean

Inspections, maintenance, repairs and training will be completed in full compliance with the most recent IMO/SOLAS regulation and according to manufacturer's specifications.

Our technicians are capable of carrying out the Annual Examination and 5 Year Inspections, as well as fiberglass and welding repairs, engine and jet drive overhauls, and

replacement of complete hook release systems. We are a service provider and distributor for Steyr, Yanmar, Lister Petter and Bukh engines and for Hamilton Jets.

We keep our clients equipment safe and operational, ensuring that the equipment will comply with all applicable rules & regulations. Our companies are acknowledged and approved by major class societies

including, ABS, LR, DNVGL, Class NK and by flag states including Panama, Liberia, Cyprus and Antigua & Barbuda. Our technicians are certified and or trained by leading manufacturers from Germany, Norway, Korea, Japan and China. Furthermore, they are fully competent and work well on equipment made by other manufacturers in presence of class surveyors.
