Schaller Oil Mist Detector

We are the only Authorized Partner for After Sales Services in the USA.

As a world market leader with more than 53,000 equipped engines Schaller Automation provides you the best protection against crank case explosions by detecting oil mist in the crank case.

Required by Solas regulation II-1/27.5, engines of 2,250 kW and above and/or minimum 300mm cylinder bore are

obliged to be equipped with safety measures to avoid a crankcase explosion caused by igniting oil mist.

As an authorized service and spare parts distributor, Breakwater International provides a team of highly qualified service technicians available 24/7 to service, troubleshoot and/or repair your Oil Mist Detector.

Serving the US we ensure to provide you the best service network for a quick reaction time.

Either for a retrofit or for an upgrade of your system, our team will guide you through the best option that fits for you.
