

LED T8 High Output Tubes

The unique designed T8 High Output tubes are setting the benchmark for price and performance. These high efficiency LEDs can be directly dropped into existing T8/T12 sockets (after ballast removal) and features the V-Blox “no questions asked” 5 year replacement warranty.

Features

- High performance built-in isolation driver: PFC>92%, efficiency>88%
- Light source: 98pc Samsung SMD 5630 LED; lighting angle and excellent optical uniformity
- Housing material: G13+ unique aluminum heat dissipation structure
- Opticals: high quality PC cover, light transmittance over 92%
- Color rendering index: Ra>85
- Energy saving: 50%–70% compared to traditional fluorescent lamps
- Lifespan: LM70 40,000 hours
- Warranty: 5 years- “One Call” U.S. Warranty Replacement
- Containing no mercury and other harmful substances
- Directly substitute fluorescent tubes, simply remove the ballast

Standards

- Model: T8 Tubes
- Input Voltage: 100~277V
- Nominal Wattage: 18W
- Color Temp.: 4,000K to 5,000K
- Lumen Output: 1,900lm (Frosted) 2,050lm (Clear)
- CRI: >85
- Beam angle: 120°

*5 yr. standard replacement warranty.
