CEO'S MESSAGE

At Tru-Marine, our passion lies in delivering reliability where it matters most—keeping your operations running smoothly, efficiently, and without compromise. For nearly five decades since 1977, we've stood by our customers, providing expertise, precision, and unwavering support when it's needed the most.

We believe in continuous innovation and sustainable solutions, not just to meet today's challenges but to shape a stronger, more resilient future for our industry. Our global team is dedicated to ensuring that every service we provide adds real value, giving you the confidence to move forward with certainty.

Thank you for trusting Tru-Marine. Your success is our commitment, and we're here to power your journey ahead.

James Loke

Group Chief Executive Officer

ABOUT US

Established in **1977**, Tru-Marine delivers integrated MRO solutions for **turbochargers, governors, fuel systems, and engines**.

With strategically located service stations in **Singapore, China, Netherlands, UAE, and Turkey**, we enhance marine engine efficiency and reliability worldwide—ensuring vessels stay operational with minimal downtime.

We use **laser cladding**, **welding**, **high density arc spray**, and **HVOF coating** to enhance durability, wear resistance, and corrosion protection, ensuring superior long-lasting performance in demanding environments.

Enhanced Durability

Our advanced repair technologies restore damaged parts while preserving their structural integrity.

Extended Lifespan

A cost-efficient repair solution that prolongs component life and minimizes replacements.

High-Quality Material Bonding

Ensures durable and reliable parts performance post-repair.

Quick Turnaround

Swift, precise repairs to get your equipment back in operation faster.

OUR SUSTAINABILITY STRATEGY

At Tru Marine, we aim to achieve Net Zero by 2030 in line with Singapore's Green Plan by carbon management and adoption of circular processes to reduce carbon emissions and enhance efficient energy management.

- Optimize MRO services through use of AI and data analytics
- Eco-friendly operational processes
- Carbon emissions reduction
- Commitment to Environmental Sustainability
- Environmental Responsibility
- Enhancing engine lifespan
- Circularity across our MRO processes
