OMD detector head base unit sub assembly

Product overview

The Graviner OMD detector base unit sub-assembly is a replacement spare compatible with all Graviner OMD Mk6 and Mk7 detector head.

"The Graviner OMD detector base unit sub-assembly includes:
- Standard sample pipe length of 83 mm,
- Connector push-in test port,
- Detector base moulding O-ring seal,
- Two M6 hex screws and retaining washer for connection to the detector head,
- Lock-nut and washer for mounting to the engine wall.

The Mk6 & Mk7 detector heads are fitted to the base by two M6 allen head screws, allowing the head to be quickly replaced in the event of a failure.

Mounting points need to be a 3/4" BSP tap hole.
