SHIP MANAGEMENT

Ship Management Services is the latest addition to our expanding portfolio, strengthening our presence across the offshore and marine sector.

With a young and diverse fleet of managed vessels, we aspire to be a leading provider of offshore support vessels and marine logistics. Through our extensive network of ship owners, we source and provide a wide range of offshore vessels, including:

- Offshore Supply Vessels (OSV)
- Platform Supply Vessels (PSV)
- Anchor Handling Tug Supply Vessels (AHTS)
- Utility & Accommodation Vessels
- Accommodation & Cargo Barges
- Landing Crafts & Multi Cats
- Crew Boats & Fast Supply Vessels
- DP1 & DP2 PSVs, AHTS & Accommodation Workboats

Ship Management & Consultancy

Our professionally structured shore-based management team works closely with vessel owners to ensure safe, efficient, and cost-effective operations. Through strict implementation of our Quality Management System, marine software solutions, and regular inspections, we ensure vessels are maintained to the highest operational standards. Our consultancy services include vessel inspections, surveys, audits, engineering, and maritime advisory services.

Ship Broking & Chartering

Remote Site Middle East bridges the gap between ship owners and charterers, offering professional brokerage and chartering services. From enquiry to final settlement, we manage the entire charter cycle, ensuring smooth operations, reliable vessel sourcing, and continuous support throughout the charter period.

Towage Services

In collaboration with our trusted ship owner network, we provide multi-purpose tug solutions for towage of barges, drilling rigs, offshore structures, and marine assets, supporting complex offshore operations efficiently and safely.
