Who we are

Global reach and local presence

- Johnson Controls Global Marine Services has global reach while remaining active at the local level.
- With our many locations around the world, we can service all types of HVAC and refrigeration equipment within all marine segments: Merchant, Fishery, Navy, Offshore and Cruise.
- Customers receive on-the-spot assistance while their vessels are in service or in dry dock.

Did you know

- Our installed base currently includes more than 18,000 installations. This means that more than 20 percent of all larger ocean-going vessels have our equipment installed.

Great customer experience

We seek to maximize efficiency and value for all our customers.

True 24/7 experienced technical support

- Global Marine Services provides intelligent preventive maintenance to ensure that operation efficiency remains at a maximum throughout the working life of the HVAC/R system.
- Supported by experienced refrigeration and marine engineers, our staff are experts in their field in dealing with all aspects of maintenance.
- We adhere to the latest guidance regarding the use of environmentally friendly refrigerants and reductions in fuel consumption usage.

Our values

Global reach

Our Marine Services network ensures an organization with a global reach that's known and active at the local level.

Customer satisfaction

Customer focus is the key to our success. Our colleagues strive to serve our customers in the best way possible.

Innovation

We believe in discovering new solutions and opportunities that we can pass on to our customers.

Improvements

To continually improve the value we provide to customers, we strive to become more competitive and capture new opportunities.

Sustainability

As we focus on efficiency and environmental protections, sustainability plays a significant role in the future of our products, services and operations.

Quality

We will distinguish ourselves through the exceptional quality of our products and services.

About Johnson Controls

Johnson Controls, a global leader in thermal management, mission-critical building systems, energy efficiency, and decarbonization, helps customers use energy more productively, reduce carbon emissions, and operate with the precision and resilience required in rapidly expanding industries such as data centers, healthcare, pharmaceuticals, advanced manufacturing, and higher education.

For more than 140 years, Johnson Controls has delivered performance where it really matters. Backed by advanced technology, lifecycle services and an industry-leading field organization, we elevate customer performance, turn goals into real-world results and help move society forward.
