

CONTAINER VESSELS

We have a lot of experience in serving some of the world's leading container vessel operators. Specifically for container vessels, we offer complete solutions for cargo hold smoke detection systems, fire detection, gas detection and all types of ballast- and cargo control equipment.

TANKER VESSELS

Lavastica International supports a large fleet of international tanker vessels and FSO/FPSOs. Specific solutions we offer for such vessels include gas detection systems, tank level measurement systems and flow meters.

DREDGING VESSELS

As a Dutch company, Lavastica International knows about dredging vessels. We have a lot of experience in this field and offer solutions specifically for these kind of vessels, such as highly advanced submersible valve remote control systems, fire detection systems and tank level measurement.

PASSENGER VESSELS

With over 25 years of experience, we have been working with cruise vessels, super yachts and ferries for long enough to know what the specific requirements and demands are for these vessels. For passenger vessels, we offer fire detection systems (in custom colors), communication, signalling and measurement & control equipment.

GENERAL CARGO

Most of the world's cargo is transported by sea. It is of highest importance that this is done in a safe way. That is where Lavastica International comes in. We provide solutions for fire detection systems, safety systems, cargo control systems, flow meters and much more.

WORK BOATS

Most systems are designed for large seagoing vessels. Because of this, most work boats are equipped with systems that are too complicated for the purpose. Lavastica International provides systems and solutions that suit the needs of smaller vessels.

& MORE

Lavastica has more than 4.000 customers worldwide. We have the knowhow, experience and extensive product range to keep your vessels sailing in the fastest and most economical way.

www.lavastica.com

Lavastica International B.V. was founded in 1998 in the Netherlands and has since built a strong reputation within maritime, oil & gas and industrial markets. In 2023, Lavastica opened its second office in Thailand to accommodate better support and distribution worldwide.

As value adding supplier and service provider, Lavastica has its focus on keeping the installations of the customers operational at all times and in the most economical way.

SERVICE

Performing regular service and maintenance on your systems will extend the lifetime and reduce costly unnecessary downtime. Whether you require emergency service, refit assistance, commissioning or just some advice, we will be here to help you.

REPAIR

We have the ability to repair, calibrate or overhaul your products in our workshop. When your equipment is out of production, repair might be the only option left to keep your systems running. Contact our service department to see if we can also repair your products.

RETROFIT & NEW PROJECTS

Whether you are building a new vessel or you have a retrofit project, Lavastica International offers complete turn-key solutions. From engineering all the way to commissioning, our project engineering team is capable of handling it all. Get in touch with us if you have any projects planned or ongoing.

To check if we are able to service your system, give us a call or send an email to our service department;
