

REDUCE YARD TIME. MAINTENANCE, REPAIR AND OVERHAUL WITH VIEGA.

viega.com/Marine

Time Saving

- Up to 80 % faster than welding or soldering (depending on dimension)
- Connect pipes from 15 to 108 mm or 3/8 to 4 inch (depending on used system) in seconds
- Use one press tool for all materials

Availability and Quality

- Piping systems made in Germany
- Resilient supply chain due to worldwide distribution network
- Procuring high-quality parts saves on breakdowns, costly repairs, and extends the life of your vessel

Labor and Fire safety

- No fire hazard or hot works required
- Safety repairs of pipelines without firewatch
- No additional impact of welding gases on the environment, fabricators, and interior design

360° – Increasing efficiency

- Fast and efficient installation of media lines, control rooms and distribution shafts
- Piping systems with positive impact on decarbonization – e.g. alternative drives, trim optimization, heat recovery or energy-efficient on-board supply
- Weight optimization by choosing the right pipe material
- Support during piping inspections onboard and product demo

Classified by:

viega

SAFE VESSEL OPERATION.

Viega products make maintenance, repair and overhaul (MRO) easier for customers working on vessels with small spaces and with tight windows for work. With no need for flame or harsh chemicals, workers can use Viega press fittings to make quick connections while other trades work alongside them.

Smart piping retrofits to increase ship efficiency

- Optimize your existent piping layouts and weight with use of leight materials
- Easy and fast replacement pipelines in copper, stainless steel, CuNiFe and multilayer
- Important! Viega also offers adapter from BSP (metric) to NPT (imperial) threads

Repair of thick-walled steel pipes

- Megapress press fittings to work with tankers, bulkers, gas carriers and other cargo ships
- Steel pipe connections in under 16 seconds until 114 mm (4 inch)
- Press-in branch connector for subsequent use of measuring points

viega.com/Megapress

Individual composition of service packages for your ship

- Viega press tool combined with the right material assortment (with common inspection on board)
- Low weight of jus 3,2 kg with 360° rotating press head. 42,000 pressing before maintenance check
- React immediately in case of emergency repairs

Potable Water Management

- Maintaining of water quality on board automatically (AquaVip Zirk-e)
- Optimized flow rates with smart circulation valves for safe water and energy supply
- Protection against bacteria as legionella
- Increased comfort through noise reduction and precise temperature control
