

APPROVALS PORTFOLIO

Wave Marine Approvals Portfolio

Classification-approved marine safety services for shipowners, ship managers and procurement teams

Wave Marine Services Unipessoal, LDA | Sines, Portugal

Class approvals buyers can verify

Wave Marine presents a consolidated approval portfolio for marine safety services across **leading classification societies**.

VERIFIABLE

Class-recognized capability

Documented approvals from major classification societies.

Safety-critical service support

Lifesaving appliances, fire-fighting systems and breathing apparatus.

Procurement confidence

Certificates, references and validity dates consolidated for review.

APPROVED SERVICE SCOPE

Core safety service coverage

The portfolio supports vessel safety compliance through approved inspection, maintenance, testing, overhaul and repair services.

Lifeboats and rescue boats	Maintenance, thorough examination, operational testing, overhaul and repair.	LSA
Launching appliances	Davits, winches, on-load release gear and automatic release hooks.	GEAR
Fire-fighting systems	Fixed and portable fire-extinguishing systems, detection and alarm systems.	FFA
Breathing apparatus	SCBA, EEBD and related breathing apparatus equipment.	BA

INSPECTION | MAINTENANCE | TESTING | OVERHAUL | REPAIR

SAFETY

CLASSIFICATION COVERAGE

Approvals span major class societies

Wave Marine's approval portfolio includes recognized classification societies relevant to global vessel operations.

SOCIETY	APPROVAL FOCUS	VALIDITY HIGHLIGHT
ABS	LSA, FFA and breathing apparatus	Active through 2027-2028
DNV	LSA, FFA, breathing apparatus and inflatable lifesaving equipment	Active through 2027-2028
Lloyd's Register	LSA, FFA, SCBA and hydraulic tests	Active through 2028
ClassNK / KR / RINA / BV	Additional class-recognized safety service coverage	Active according to certificate schedule

MULTI-CLASS APPROVAL EVIDENCE CONSOLIDATED FOR BUYER REVIEW

CLASS READY

LSA approvals support critical vessel operations

The lifesaving appliance portfolio covers core equipment required for vessel safety readiness and class survey preparation.

LSA

Approved support for equipment that protects crew and keeps vessels survey-ready.

Scope includes maintenance, examination, operational testing, overhaul and repair across key lifesaving systems.

01

Lifeboats, rescue boats and fast rescue boats

Maintenance, examination, operational testing and repair for core survival craft.

02

Launching appliances

Davits, winches and associated launch systems supporting safe deployment.

03

Release systems

On-load release gear, automatic release hooks and related mechanisms.

Fire and breathing approvals strengthen compliance

The portfolio supports fire safety and emergency breathing equipment maintenance for ship operators.

Fire-extinguishing systems Supports planned maintenance and inspection readiness.

Fire alarm and detection systems Helps maintain vessel safety system availability.

SCBA and EEBD Supports emergency preparedness and regulatory compliance.

Hydraulic tests Adds technical support for selected fire-fighting and breathing equipment scopes.

CLASS-APPROVED SCOPE | MAINTENANCE PLANNING | INSPECTION READINESS

FFA/BA

Approved service coverage for fire-fighting appliances and breathing apparatus helps procurement teams qualify suppliers for safety-critical work.

WAVE MARINE APPROVALS PORTFOLIO

EQUIPMENT COMPATIBILITY

Manufacturer coverage improves service fit

Certificate schedules and appendices include service coverage for major lifeboat, davit and safety equipment manufacturers.

BUYER VALUE

Approval scope can be matched to vessel equipment before nomination.

The portfolio helps procurement teams verify whether class approval, equipment type and manufacturer coverage align with fleet [SCHEDULE / APPENDIX REVIEW](#) requirements.

01 Fassmer + Hatecke

Commonly encountered lifesaving appliance brands across merchant vessel fleets.

02 Global Davit + HLB / Hyundai Lifeboats

Davit and lifeboat service applicability for vessel maintenance planning.

03 BADA Heavy Industries + Oriental Precision & Engineering

Wider OEM coverage supporting fleets with diverse safety equipment configurations.

04 Zhejiang Hengxin Ship Equipment

Additional equipment coverage noted in certificate schedules for scope verification.

USE ORIGINAL CERTIFICATE APPENDICES TO CONFIRM EXACT MODEL AND SERVICE SCOPE.

OEM FIT

CERTIFICATE VALIDITY

Consolidated validity view

The approval set gives buyers a practical view of current certificate validity and renewal planning.

Near-term monitoring

Bureau Veritas approvals valid until 20 Apr 2026.

2027 renewal window

DNV FFA / inflatable lifesaving, Korean Register FFA, and ABS FFA / breathing approvals.

2028 coverage

ClassNK LSA, RINA, ABS LSA, DNV LSA and Lloyd's Register approval groups.

PROCUREMENT SIGNAL

Validity dates are consolidated to simplify RFQ checks and renewal planning.

ACTIVE SET

PROCUREMENT QUALIFICATION

Why buyers should shortlist Wave Marine

Wave Marine is positioned for buyers seeking class-approved technical service capability, documented compliance and practical support for vessel safety equipment.

SHORTLIST LOGIC

A supplier profile built around evidence, scope and operational readiness.

The approval portfolio reduces qualification friction by consolidating class evidence, safety-service scope and fleet applicability in one buyer-facing package.

QUALIFIED

PROCUREMENT CRITERION

WAVE MARINE ADVANTAGE

01 Compliance evidence

Consolidated certificates and approval references for review during supplier qualification.

02 Multi-scope capability

LSA, launching gear, FFA, SCBA, EEBD and inflatable lifesaving equipment coverage.

03 Fleet applicability

Coverage across multiple classification societies and equipment manufacturers.

04 Operational readiness

Support for inspection, maintenance, testing, overhaul and repair planning.

Recommended use in buyer engagement

The portfolio can be used as a concise buyer-facing document during RFQs, supplier qualification and fleet maintenance planning.

01

RFQ response

Attach the consolidated portfolio and relevant original certificate.

02

Supplier pre-qualification

Highlight class approvals and validity dates for quick procurement review.

03

Ship manager discussions

Match vessel equipment to class approval and manufacturer coverage.

04

Renewal planning

Monitor certificates approaching expiry and refresh the portfolio periodically.

GOVERNANCE NOTE

Use the deck as supporting evidence only when engagement is authorized; confirm exact scope against original certificate appendices before nomination.

RFQ READY

PROCUREMENT NEXT STEP

Next step for procurement teams

Review the approval portfolio, confirm vessel equipment scope and verify the applicable **original certificate appendix** before service nomination.

01

Review approval portfolio

Use the consolidated document as the first qualification reference.

02

Match vessel equipment scope

Check class society, equipment group, manufacturer and service requirement.

03

Verify original appendix

Confirm the precise certificate schedule before final service nomination.
