

Comprehensive overhauls and service of deck machinery

25+
years of experience

220+
satisfied
clients

3000+
completed
projects

Over 25 years of continuous support for our clients on sea and land

Since 1999, we have been providing repair and maintenance services for both the maritime and land-based industries. We specialize in overhauls, modernization, and servicing of onboard equipment and hydraulic systems. Our range of expertise also includes mechanical and electrical repairs, as well as class surveys and maintenance.

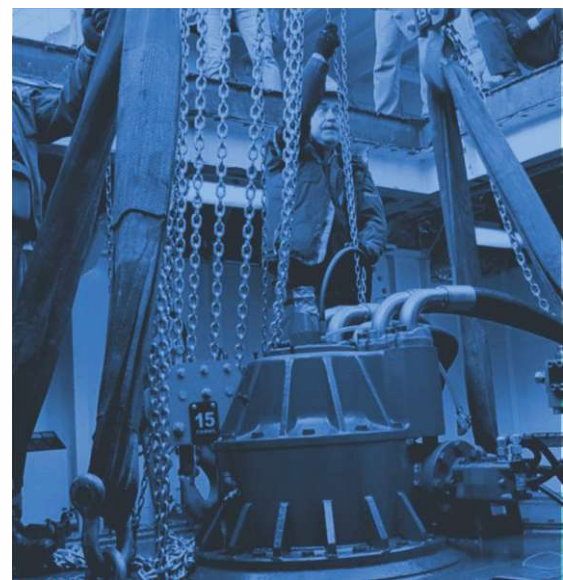

Our company is based in Gdynia, Poland. We operate both locally - in Polish ports and shipyards - and internationally. Over the years, we have completed thousands of projects in more than 50 countries, from European harbors to the shores of Australia.

We're available **whenever you need** a proven technical support

Full-service technical infrastructure

Our 2,000 m² service and workshop facility in Gdynia is fully equipped to handle even the most complex projects, including large-scale equipment and demanding technical challenges.

Our services

The scope of our work includes:

- Windlasses and mooring equipment, electric and hydraulic winches, capstans
- Hydraulic pumps and motors
- Hydraulic power units
- Hydraulic and electronic control systems
- Gearboxes
- Hatch cover systems
- Hydraulic cylinders
- Deck cranes, provision cranes, gantries
- Rescue boat and lifeboat davits, freefall ramps, gangway winches
- Wire rope systems
- Load testing of cranes and lifting equipment
- Steering gears
- Equipment and system installation on newbuilds
- Service of hydraulic machinery and systems for the land-based industry

Top-level troubleshooting

Each project is managed from A to Z - from diagnosis and parts selection to repair, installation, and final testing.

WE DIAGNOSE – WE REPAIR – WE COMMISSION

www.etmal.com.pl
