

CFDPLAS® PFA Sample Vials

CFDPLAS® PFA vials have been the best choice for demanding trace metal applications, and are used in laboratories worldwide for sample preparation and storage.

The flat bottom and high service temperature range makes them ideal for use directly on a hot plate.

Molded from high purity virgin PFA, they are chemically inert, with ultra low trace metal content.

Features:

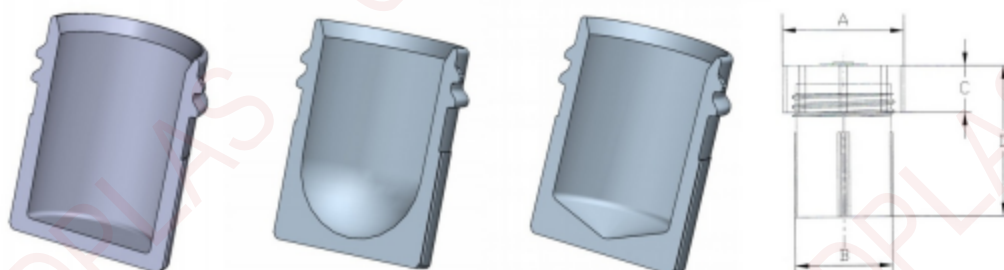

- ❑ 7ml to 120ml net filling volume
- ❑ Available with flat, conical and rounded interior style configurations
- ❑ Temperature range of -200 °C to 260 °C (- 328°F to 500°F)
- ❑ Flat bottom, self-standing, Fit on hot plate
- ❑ Molded from high purity virgin PFA, Chemically inert, with ultra-low trace metal content, Non-contaminating
- ❑ PFA vials with threaded closures designed primarily for storage of samples, HF-resistant, Leak-proof seal

Application:

These specialty PFA vials are primarily used for sample preparation in geochemistry. It can be used in PFAS analysis (environmental, drinking water, regulatory testing), HPLC and UHPLC, LC-MS and ICP-OES/MS, Ion Chromatography (IC), Capillary Electrophoresis (CE), Bio-analysis (proteins, peptides, biologics), Trace-level and low-adsorption analytical workflows.

It is widely used on Semiconductor Industry, Liquid Crystal & Precision Equipment, Electronic Engineering, Industrial Chemistry, Pharmaceuticals, Medicine & Life Sciences, Food & Beverage, Environmental Analysis, Geochemistry, Geology, and Oceanography.

CFDPLAS® PFA Sample Vials

Vials Model No.	Volume (ml)	Diameter B (mm)	Height D (mm)	Closure A (mm)	Closure C (mm)	Remarks Vials Type
CFD-VIA-007	7	22	36	27	13	S
CFD-VIA-015	15	29.5	39	36	15.5	S
CFD-VIA-030	30	29.5	66.5	36	15.5	S
CFD-VIA-060	60	47.5/66.5	58/33	51.5/75	29/19.5	S/W
CFD-VIA-090	90	47.5/66.5	85.5/45	51.5/75	29/19.5	S/W
