Provisions:

- Service Suppliers are to keep records of the approved operators / technicians / inspectors including information on their training and experience for the services for which they are approved.
- Equipment used by the approved Service Suppliers shall be appropriate for their scope of work and must regularly tested and calibrated according to their ISO certified operating procedures.
- For categories of Service Suppliers that require certification from Manufacturers, Manufacturer's documentary evidence that the Service Supplier has been certified or licensed to service the particular makes and models of equipment should be retained at their care and responsibility.

This Document of Approval may be withdrawn if:

1. The services rendered have been improperly carried out or the results improperly reported.
2. The necessary provisions for the maintenance of the approval elapse.
