

Instrumental Dufour

Providing magnetic compass services and certificates since 1939

Remote Calibration Services

Calibrate your magnetic compass wherever you are sailing 24/7

The remote calibration method is way more efficient than the traditional one. The ship will be able to calibrate the compass at any location and without having a technician on board or docking at any port. This will save companies big amount of time and money as there is no need to pay high embarkation and disembarkation fees. There is a fix budget which not depends on the amount of time it takes to get the job done.

Our certificates are under all SOLAS and IMO regulations, making them ready to be presented to any local or international maritime authority. Certificates are signed digitally in order to improve security. Instrumental Dufour count with all legal validations from PNA (estate member of IMO), making us the only authorized magnetic compass lab in Argentina.

How is the procedure?

We optimized the process in order to made the adjustment easier and faster

We developed an online platform where captains could find a detailed explanation in how to collect magnetic compass information and attach it all in one place.

- Technician will ask the Captain for the necessary information.
- Once analyzed, Captain will receive easy and detailed instructions on how to proceed with the adjustment.
- Technician will be attentive in order to help with any inquiry
- Once all corrections are made, technician will issue the new deviation sheet and certificates
- All comunicações between the ship and the technician are by email, Agents and enterprises must be put in copy
