MARINE PROTECTION SPECIALISTS

SPECIALIST PROTECTION SOLUTIONS FOR THE MARINE INDUSTRY

Beck provides high-quality surface protection materials for the marine industry- shipbuilders and refitters around the world trust our products to keep their projects safe. Many of our materials are flame retardant and certified to international standards, including LPS1207 and the IMO Wheelmark. Our experienced team works with you to find the best protection solutions for your vessels and projects helping you work safely, efficiently, and with confidence.

WHY MORE CUSTOMERS CHOOSE BECK MARINE:

- ~ Trusted advice - expert guidance for every project
- ~ Fast delivery - worldwide shipping, when you need it
- ~ Large stocks holding - ready for any order
- ~ Certified safety - IMO & international flame-retardant standards
- ~ Sustainable solutions - protection with the environment in mind
- ~ Custom branding - print your logo and company details

MARINE MARKETS WE SUPPLY WORLDWIDE INCLUDE:

- ~ Cruise & Ferry Ships
- ~ Super Yachts
- ~ Military & Industrial vessels
- ~ Off-shore Operators

CASE STUDY - WONDER OF THE SEAS

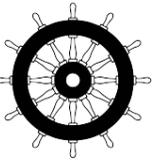

PROGUARD® FR Anti-Slip Carpet Film was used to protect flooring during construction on the Royal Caribbean cruise ship, Wonder of the Seas. Its adhesive backing adheres securely to most carpets and carpet tiles, keeping the film in place and providing safer, more reliable protection than traditional dust sheets or polythene.

To speak with a protection specialist and to receive a free quotation either visit our website www.beckuk.com, email us at sales@beckuk.com or call us on 01432 263 598 (International: +44 1432 263 598).

OUR SPECIALIST MARINE PROTECTION RANGE INCLUDES

FLAME RETARDANT CORREX AND IMO-CERTIFIED PROTECTION BOARD

Manufactured from durable corrugated polypropylene, our protection sheets provide reliable, long-lasting coverage for windows, doors, stairs, walls, and floors across all marine projects. Lightweight yet exceptionally strong, they resist tears, punctures, and impacts. Easily cut, curved, or creased to fit any surface, protection boards complete protection during all stages of marine construction and refurbishment.

Benefits:

- ~ Lightweight and flexible
- ~ Quick and easy to cut, crease and curve
- ~ Durable and reusable
- ~ 100% waterproof
- ~ Personalised logo printing available
- ~ Most products are flame retardant to LPS1207 and an IMO-certified option is also available
- ~ Resistant to chemicals
- ~ 100% recyclable

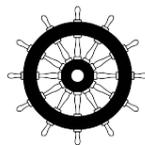

PROGUARD® CARPET AND HARD SURFACE FILMS

Our carpet and hard surface films provides reliable protection against damage during marine construction and refurbishment projects. By safeguarding carpets from spills, dirt and wear, it helps minimise repair and replacement costs while reducing the risk of costly project delays.

Carpet Film Benefits:

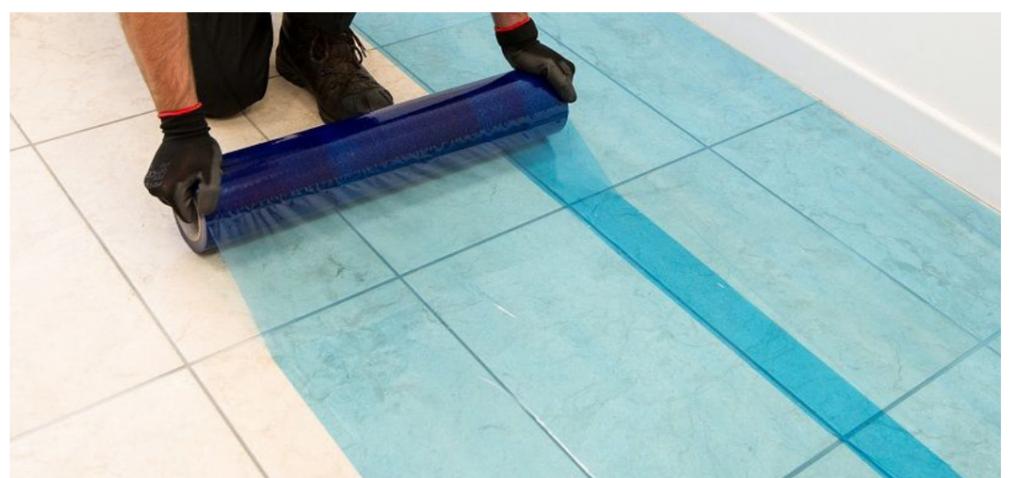

- ~ Flame retardant- IMO 2812/2025 ERO 2812/ MED1030
- ~ Embossed anti-slip finish
- ~ Forward wound
- ~ Self-adhesive for easy application
- ~ 100% waterproof
- ~ High tear & puncture resistance

2812/2025
ERO2812/MED1030

Hard Surface Film Benefits:

- ~ Self-adhesive for easy application- no taping required
- ~ Lightweight, easy-to-handle rolls
- ~ High tear & puncture resistance
- ~ 100% waterproof
- ~ Easy to cut with a knife

OUR SPECIALIST MARINE PROTECTION RANGE INCLUDES

PROGUARD® PREMIUM FLAME RETARDANT FLEECES

Our multi-functional, non-woven fleece provides superior protection for floors against liquids, dirt, and damage. Engineered for environments with strict fire safety requirements, it features flame-retardant properties that make it ideal for ship and yacht fit-outs, refurbishments, and maintenance projects where both performance and compliance are essential.

Benefits:

- Impermeable, 100% waterproof
- High flame retardancy
- Non-slip for safety & self-adhesive
- Reusable & easy installation
- 100% residue-free on removal
- Flexible material - ideal for wrapping around awkward objects

FR BUFFERBOARD™:

PROGUARD® Fire Retardant Bufferboard is a crush-resistant polypropylene board designed for heavy-duty protection. Its honeycomb structure provides excellent impact resistance, ideal for areas with wheeled scaffold towers or heavy equipment. Moisture-resistant and easy to cut, it is our most durable and reusable fire-retardant protection board.

FR DOOR SLEEVES:

Our LPS 1207 certified, fire-retardant, semi-translucent door sleeves fit standard doors and provide cost-effective protection from dust, dirt, paint, and mortar during building and marine projects.

TAPES:

Our PROGUARD® adhesive tapes offer a wide range of jointing solutions for marine projects. From high-tack and low-tack to double-sided and flame-retardant options, we provide tapes suited to every requirement during ship and yacht fit-outs, refurbishments, and maintenance.

...AND LOTS MORE!

We offer a wide range of temporary protection products for the marine industry. If you have specific requirements, please get in touch, we'll make sure your project is fully protected - We've got it covered!
