ONE STOP MARINE EQUIPMENT SOLUTION

For the shipbuilding and shipping industry, professional technology and high-quality service ship equipment suppliers are undoubtedly the top priority. After nearly 10 years of development, our company has gradually expanded from a single land-use industry to the shipbuilding industry. And made new achievements and breakthroughs in ship equipment, spare parts supply and ship repair, ship main engine spare parts renovation business. In the future, we will, as always, serve customers more efficiently, professionally and refinedly, and achieve one-stop precise service. We firmly believe that, through professional marine knowledge, strong technical service team and reliable solutions, to ensure the safe and smooth operation of your vessel, you can rest assured on a global scale

ENTERPRISE BACKGROUND

Qingdao ShunKong Electrical Engineering Co.Ltd established in 2012.It is a company with industrial automation as its main business, integrating science, industry and trade. It specializes in industrial automation engineering project design, programming, debugging, installation and other services and acting as an agent for the sales of various imported products of electrical and automation brand .Due to its rich industry experience, Shun Kong provides customers with a flexible range of services from a complete set of electronic control solutions to component distribution. At present ,The main business areas involve dozens of industries such as machinery manufacturing industry, shipbuilding, electric power, petrochemical, beer industry, medicine, food processing, municipal engineering and so on.

ENTERPRISE DEVELOPMENT>>>>

After nearly 10 years of development , with the continuous expansion of its business scope, it has gradually expanded from a single land-use business to the Marine field (Marine equipment spare parts supply, Marine repair, Marine diesel engine spare parts renovation), In order to serve customers more efficiently and professionally, and to achieve one-stop service, the company register its subsidiary company in the UK in 2021 , Shun Kong Marine Electric Technology Limited ,which is dedicated to the business development in the marine field for overseas users. At the same time, Shun Kong Marine Electrical Engineering Co., Ltd. is divided into two independent business divisions, the land-use business division and the marine business division, which are dedicated to better serving domestic land and marine users.

With rich experience of ship spare parts market,we are currently working with many well-known domestic and foreign manufacturers of main and auxiliary engine ,Turbocharge, Shafting and Thruster, Ship Handling Equipment (Windlass, Winch, Steering Gear), Steam Boilers, Refrigeration and Air-conditioning Units, Compressor, Fresh water generator , Automation systems, Anti-pollution Equipment (Oil-water Separators, Incinerators, Sewage Treatment Plant, Ballast Water Treatment Systems, ship desulfurization tower units/Scrubber), and Various Auxiliary Equipment Oil separators , Marine Pumps and Piping Systems, Various Types of Motors, Loading and Unloading Equipment Deck Cranes, Ship Communications, Navigation Aids and Radar Equipment,Life-saving and Fire-Fighting Equipment and other marine equipment manufacturers, and have established long-term strategic business cooperation. We have signed an agency agreement with well-known domestic and foreign marine equipment manufacturers. We firmly believe that a one-stop spare parts service provider with a wide range of business, comprehensive, efficient, high-quality, will greatly improve your operational efficiency and provide you with refined, in-depth and efficient management , greatly reducing the cost.

LAND SERVICE DIVISION

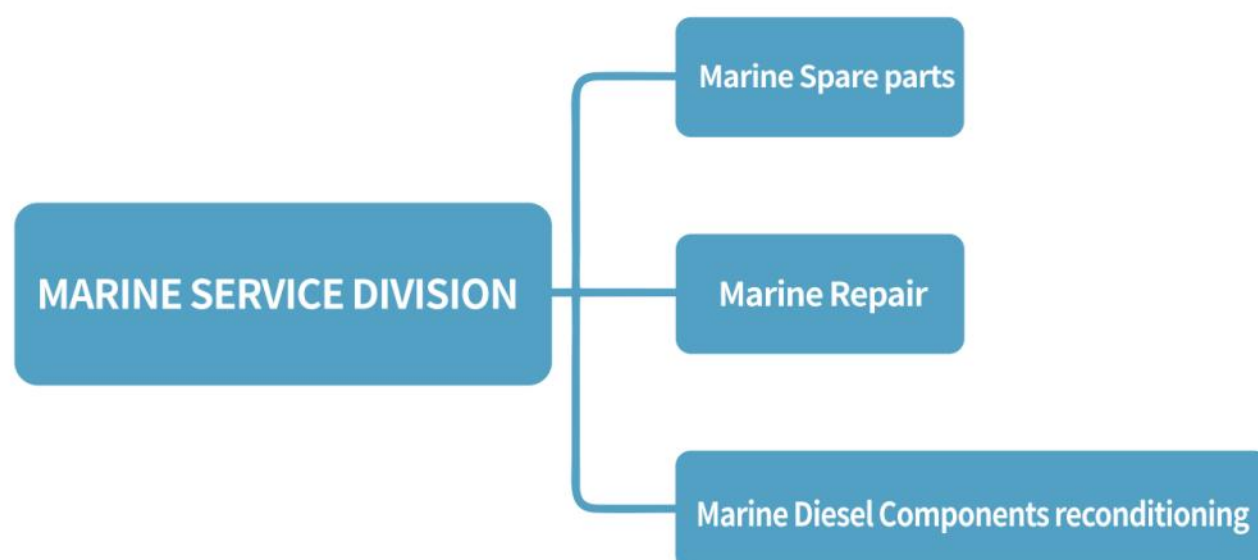

The land business division has established long-term and stable technical and business cooperation relations with many well-known imported brands, including Schneider , Siemens , Omron , Mitsubishi, ABB,AB,LG etc. The company has a professional and powerful technical service team. With first-class technical services, the company wholeheartedly provides users with automatic control solutions. From design and model selection to commissioning and operation, all-round tracking service eliminates all worries for users. After years of development, the company has grown into a large automation company integrating system integration, on-site construction, after-sales maintenance and product sales.

MARINE SERVICE DIVISION

The marine division, with the participation of technicians such as former MAN engineer and former ABB Turbocharger Service engineer with decades of experience, as well as 10-year sales and procurement elites in the field of marine equipment and spare parts, relies on its cooperation experience in serving hundreds of domestic and foreign shipbuilding industry customers (the cooperative customer fleet involves container ships, bulk carriers, chemical ships, dredgers, piling ships, salvage ships, bulk carriers, oil tankers, etc.), We firmly believe that through professional ship knowledge, strong technical service team and reliable solutions, we can ensure the safe and smooth operation of your ship and make you feel at ease all over the world.

MARINE SERVICE DIVISION

2.1 MARINE SPARE PARTS

Authorized Agency Brand Special Zone

ALFA LAVAL

Global Top Brand Heat Exchange, Separation And Fluid Treatment Products And Solutions

The products we represent are all leading brands around the world, and their product quality and sales services have won the trust and recognition of our customers: ALFA LAVAL, whose core business is based on: heat exchange, separation and fluid handling. These three technologies are of great significance to industrial companies in all fields of business.

In its business field, ALFA LAVAL occupies the world's leading market position. Shunkong has become the world's leading provider of heat exchange, separation and fluid treatment solutions —Excellent partner of Alfa Laval;

We are able to provide unique high-quality original products for Alfa Laval marine oil separators, plate coolers, marine water generators, ballast water treatment units and AALBORG boilers Spare parts and equipment repair services. With quick and easy access to a comprehensive range of durable, high-quality components, you can increase productivity while maximizing uptime, saving you time and money in the long run.

AGENT BRAND AREA

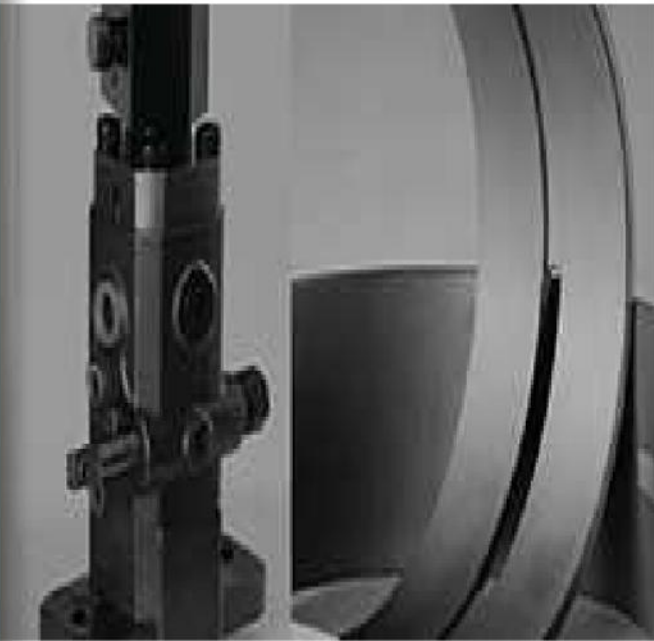

CIRCOR GROUP

IMO AB

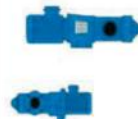

IMO US

Allweiler

Our company has become the first-level agent in Greater China officially authorized by CIRCOR (Circor Group, its brands Allweiler, IMO, Houttuin, Warren and Zenith), the world's leading pump manufacturer in the United States. Our company is committed to the promotion and sales of its products. , technical support, spare parts supply and after-sales support and other professional services, building a bridge between customers and enterprises.

ZHENHUA HAIKE (AUTHORIZED AGENT)

Our company has become the official authorized agent of Jiangsu Zhenhua pump industry (Jiangsu Zhenhua Haike Equipment Technology Co., Ltd.), a leading domestic pump enterprise, and is committed to the promotion, sales, technical support, spare parts supply, after-sales support and other professional services of its products, building a bridge between a wide range of customers and enterprises. Responsible for CP series of jet pumps, CL type, CLH type, CLZ type of vertical centrifugal pumps, CIS type and CWL type of horizontal centrifugal pumps, submersible pumps, hand pumps, vortex pumps and diesel emergency fire pumps and other products under the whole series .

(JET PUMP)

CP jet pump

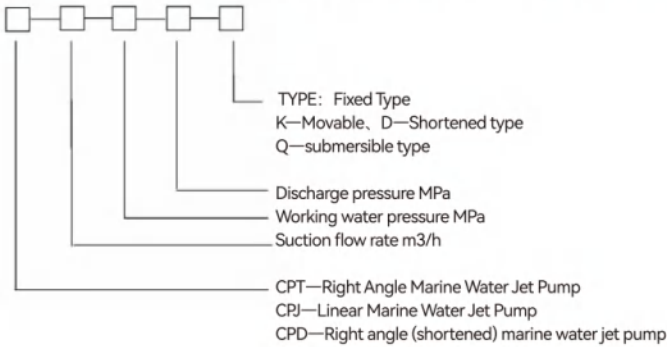

CP jet pump has simple structure, no moving parts, long service life and other characteristics, has good self-priming performance, can work continuously and stably. Mainly used in ship drainage drainage system, also widely used in Petrochemical, environmental protection, water conservancy, building materials and other industries, for pumping and discharging sea fresh water, mixed liquid, river dredging, sewage treatment, conveying powder, etc.

CPT type and CPJ type jet pump are the replacement products of CP type jet pump, which won the national patent (ZL98 2 25832.1). The suction flange axis of CPT type pump is perpendicular to the pump body axis, and CPJ type

Pump suction flange axis and pump body axis coaxial, have high efficiency, easy installation and so on.

Model Description

According to GB/T21483-2008 Marine water jet pump, its model is shown as follows:

CPT pump-Main technical performance parameters

YASHENG ROPE (AUTHORIZED AGENT)

Our company has become a well-known domestic manufacturer "Jiangsu Yasheng rope Co., LTD." cable authorized agent, the maker factory pass China Classification Society (CCS), Bureau Veritas (BV), The united Kingdom Lloyd's Classification Society (LR), American Bureau of shipping Agency (ABS), Det Norske Veritas (NORWAY) and Germanischer Lloyd (Germany) (DNV/GL), Korea Register of Shipping (KR), Nippon Kaiji Kyokai (NK). Our products are sold to more than 20 countries and regions in the world. A large number of exports, global shipments, the sale of polymer ropes, high-performance polypropylene (PP) ropes, polypropylene (polypropylene) ropes, polyester-propylene mixed ropes, polyester ropes, 6-strand nylon composite ropes, double-layer multi-strand braided ropes, Nylon ropes and other products are sold to more than 20 countries and regions in the world, including Singapore, Indonesia, Dubai and Malaysia etc.

Polymer /Uhmwpe Rope

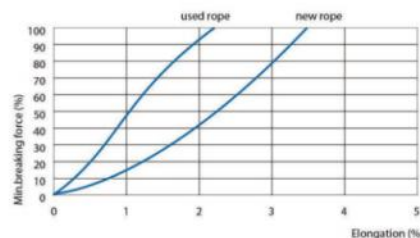

The polymer cable is made of ultra high molecular polyethylene, using proprietary design and high-tech production process to produce the best ultra high grade polyethylene rope, the same diameter under it, stronger than wire rope, 1/8 the weight of wire rope, with the same weight, polymer rope is 15 times higher than wire rope. Polymer cable is made up of unique dipping process and unique drying and heat treatment to enables the rope to achieve its best performance and anti-wear characteristics.

Application Range

Port tug, large ship mooring operations, national defense army equipment, Maritime engineering, lifting and so on.

Product Features

1. Longer service life, simple operation
2. Specific Gravity 0.97 floating in water
3. Does not absorb water and remains very light when working under wet conditions
4. Melting point: 145°C
5. Excellent chemical resistance
6. Excellent uv protection performance
7. High anti-abrasion performance
8. Low elongation 3.5% ~ 4

High Performance PP Rope

High performance PP Rope made by Top raw material of Polypropylene and polyethylene fiber (grain), which is with 20% ~ 25% higher MBL than normal PP Rope, also has higher abrasion resistance than general PP Ropes. We have two kinds of PP Rope (Multifilament and Monofilament), is the most economical fibre rope, low cost for shipowner, it's linear density is less than 1, can float on the water, and has a close strength and elongation when wet and dry, have better abrasion resistance, UV Resistance.

Application Range

It is the most economical rope among material ropes and it is the low-cost choice for shipowners.

Product Features

Specific Gravity: 0.95~0.98 floating on the water

Melting Point: 165 °C

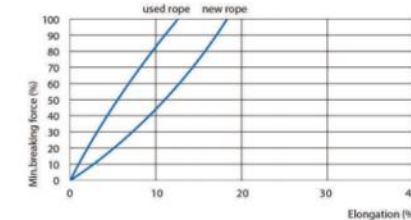

Abrasion Resistance: Excellent

Chemical Resistance: Excellent

UV Resistance: Excellent

Water Absorption: None

Elongation: 14% ~ 18%

6-Strand Nylon Composite Cable

This rope is composed of 100% nylon filament and nylon rod and core, which can make the rope stronger, longer service life, more stable and better performance, widely used in the mooring of container ships.

Application Range

Widely used in container ship mooring

Product Features

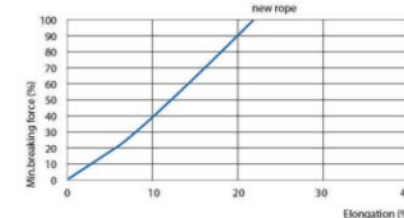

Specific Gravity: 1.14

JIANGSU HAITAI (AUTHORIZED AGENT)

We reached cooperation with Jiangsu Haitai and are overseas authorized agent of them. The company specializes in the production and research and development of Marine deck machinery, ocean engineering machinery. Mainly produces electric and hydraulic windlasses of various specifications within $\Phi 120$, electric and hydraulic mooring winches and mooring winches under 1500KN, various electric and hydraulic rotary swing cranes within 150T/45m, and engineering winches of various specifications, towing machines and other large and medium deck machinery. Advanced CNC lathes, grinders, boring machines and other professional machining equipment have greatly improved the machining accuracy and surface roughness of the products, ensuring that Haitai produces "excellent products" and "highest quality products".

JINGJIA VALVE (AUTHORIZED AGENT)

The company's main products include butterfly valves, ball valves, gate valves, globe valves, marine valves, water supply and drainage valves, hydraulic control complete sets and other valves and accessories; the main materials are cast steel, stainless steel, cast iron, bronze, etc.; the driving methods are manual, electric, pneumatic, hydraulic, etc.; valve pressure level: 0.1MPa-42MPa, nominal diameter is DN6-3200mm. The company manufactures and inspects in strict accordance with ANSI, DIN, JIS and GB and industry standard, and realizes the substitution of domestic production for imported products.

Its products have obtained China Classification Society CCS, ISO9001:2016 quality system certification, American Petroleum Institute API6D, API609 certification, European Community safety certification, CE/PED certificate. Butterfly valve and ball valve products have obtained German TUV proof fire certification API607. National special equipment TS certification, and obtained China Classification Society CCS type approval certificate, Bureau Veritas BV factory approval and American ABS factory approval certificate, and can provide product inspection certificates of LR, CL, DNV and other national classification societies.

SHIP REPAIR

Shunkong is a professional Marine exhaust gas turbocharger maintenance Service providers, with our extensive expertise, offer a full range of turbocharger services from Regular maintenance to on- site for emergency maintenance. The company has a strong service team, the main technical engineers has the working background of ABB or MAN company, and has obtained the Turbocharger training certificate issued by the Swiss ABB Group. Every engineer can independently lead the team to complete the service task of the Turbocharger. Since its establishment, the company's business turnover has grown steadily, not only has established good cooperative relations with domestic shipowners, shipyards and diesel engine factories, but also expanded the company's business to overseas markets , Currently, it has provided Turbocharger overhaul /Voyage repair and shipyard repair services to shipowners in Southeast Asian countries such as Singapore and Indonesia.

Global Service Network

We provide 24/7 comprehensive coverage for onboard and workshop services:

- Turbocharger overhaul services: • Routine maintenance;
- Rotor balancing;
- Turbine blade blasting;
- Nozzle ring and shroud blasting;
- Turbine blades and compressor wheels Renewal;
- Impeller repair and renovation;
- Turbine blade restoration and refurbishment;
- Shaft air seal plate update;
- Shaft head reconstruction;
- Turbocharger shell thickness detection;
- Impeller, turbine blade and nozzle ring dye penetration inspection.

Boiler Maintenance

The company has a team of boiler maintenance engineers and professional technicians who have been engaged in many years of excellent skills. They can conduct professional inspection, maintenance, repair and cleaning of marine boilers, heat exchangers, pressure vessels and other equipment, and have rich experience in on-site construction. Especially in welding technology, it is outstanding, reaching 100% through X-ray and UT flaw detection, and has the WPS certification of NK, DNV.GL and other classification societies. The company has offices and processing workshops in Qingdao, Zhoushan and other places, and has large processing equipment such as drilling machines, finned tube machines, needle tube machines, tube bending machines, shrinking tube machines, and coiled tube machines. Provide customers with boiler inspection, maintenance, repair, cleaning, and also meet customers' processing needs for pipes, tube sheets and other spare parts and other all-round one-stop services.

Technology Innovation

Cold Cutting Technology of Boiler Tube

After several years of accumulation of field experience, our company has developed a portable small pipe head welding seam cutting equipment, which can basically meet the cold cutting requirements of small diameter pipe heads, and the efficiency is also much higher than thermal cutting and flame cutting, eliminating the need for preheating time. And in a small space, it can be cross-operated and multiple simultaneous operations can be performed, which greatly improves the work efficiency.

Service Network

Reconditioning Items

Cylinder Cover
Piston Rod
Piston Skirt
Exhaust Housing
Piston Crown
Liner
Hydraulic Jack
Exhaust Valve Spindle & Seat
Connecting Rod
Crankshaft
Other Parts

Refurbishment Project

Two-stroke cylinder head

- Machining and re-building complete combustion chamber
- Inconel 625 cladding around fuel valve ports
- Cleaning and welding O-ring grooves to water jacket
- Machining and re-building mating face to valve seat
- Machining and repairing landing face to liner
- Heat treatment in oven relieving stress
- MT/PT/WTP check

Piston Crown

- Cleaning and repairing combustion surface of piston crown
- Cutting and welding outer circumference and ring grooves
- Machining and re-building sealing surface to piston skirt & rod
- Cleaning and welding landing face
- Drilling out and re-building thread holes
- Heat treatment in oven relieving stress
- Grinding and chromium plating ring grooves
- MT/PT/WTP check

Piston Rod

- Detail inspection and dimensions report
- Cutting cracks damages till clean material
- Welding harden material on running surface
- Heat treatment relieving stress
- Machining running surface to 0.2 mm above original diameter
- Surface hardening/HVOF of running surface
- Final grinding to original tolerance
- Skimming upper/lower flange in line with running surface
- Hardness, Roughness, MT/PT/UT check the piston rod

MARINE DIESEL ENGINE PARTS RECONDITION

The company specializes in the reconditioning and repair of marine diesel engine parts. The company focuses on the repair business, covering diesel engine cylinder heads, piston heads, piston rods, exhaust valve stems, valve seats, connecting rods, cylinder liners, oil cylinders, etc., and also involves special welding. And mechanical parts, with the Lloyd's (L) classification society issued a process approval certificate, to provide credibility for the product. The company has several imported gas protection welding machines and submerged arc welding machines and other special welding equipment, large CNC vertical and horizontal lathes and boring (milling) machines and other processing equipment, large well-type high-temperature tempering furnaces and box-type exhaust valve heating Furnace and other heat treatment equipment to provide quality assurance for products
