

TECHNICAL DATASHEET - CUBITAINERS

TVG cubitainers (or also called bladders) are designed for the safe collection, storage and handling of marine fuels oil and distillates in accordance with applicable international guidelines.

While international maritime regulations, including MARPOL Annex VI (Regulation 18) and MSC-MEPC.2/Circ.8, do not prescribe specific container types such as cubitainers, the following applies:

- Cubitainers are suitable for use in general sampling applications
- Cubitainers are attached directly to either manual valve continuous drip sampler or time-proportional automatic sampler or flow-proportional automatic sampler
- Cubitainers hold enough volume to transfer into 4-5 sub-sample bottles

TECHNICAL SPECIFICATIONS:

Description	5 L Cubitainer	10 L Cubitainer
Part Number	CUB5L	CUB10L
Material	LDPE	LDPE
Dimensions (H x W x L)	7 in x 6.5 in x 7 in	8 in x 8.5 in x 9 in
Temp Tolerance	Up to 85°C	Up to 85°C
Spout	32 mm	32 mm
